Strategic Plan 2015-2018

**Improved health equity
in Western Australia**

WAPHA exists to facilitate a better health system, with improved patient outcomes at better 'value' to the community.

The Problem

The primary health care system is fragmented and lacks strong, integrated GP led care at its core. Significant access barriers exist for people trying to navigate the system, particularly those at risk of poor health outcomes.

These barriers contribute to more than 62,000 Western Australians presenting at hospital emergency departments each year, whose care would be best managed through a co-ordinated and responsive primary health care system.

Our Solution

CURATE: Build sustainable partnerships across the health and social care systems that most effectively address the barriers impacting on the health care outcomes of people in metropolitan, regional, rural and remote Western Australia.

PLAN AND COMMISSION for quality cost effective services that are sustainable and lead to better health outcomes for people with complex chronic conditions. Engage Clinicians and Community in commissioning services that meet priority needs and reduce potentially preventable hospitalisations.

Values

Integrity • Courage • Humility • Respect • Wisdom

Strategy

Our Key Performance Indicators

- ✓ Grow flexible funding base to respond to local needs
- ✓ Decrease potentially preventable hospitalisations
- ✓ Achievement of the Commonwealth's KPIs for PHNs
- ✓ Ensure that health services commissioned lead to better patient outcomes and improved economic value to the health system
