

GP Palliative Approach Workshop

The Program of Experience in the Palliative Approach (PEPA) provides opportunities for the primary health care workforce to improve confidence and develop knowledge and skills in working with people with palliative care needs. The Department of Health has provided funding for PEPA to work with PHNs to deliver a Palliative Approach Workshop for GPs by the end of 2017.

The workshop will be facilitated by Dr Alison Parr - Director Medical Services and Consultant in Palliative Medicine, SJOG Murdoch Hospital. There will be opportunities for participant interaction with the content.

Key topics will include:

- Principles of a Palliative Approach
- Communication and Advance Care Planning
- Symptom Assessment and Management
- Terminal Phase Care
- Local Service Networks and other resources

PEPA ask that participants complete a pre and post workshop summary – a link will be sent out upon registration and completion of the event.

Each workshop has 4 category 2 QI&CPD points attached to it.

When:

Thursday 14th December: 6-8pm (registration from 5:30pm)

- Cockburn Integrated Health, Level 1, Crn Beeliar Drive and Wentworth Parade, Success
