LEARNING OUTCOMES

Immunisation Education Sessions *(outcomes may vary slightly on the day)*

This general immunisation update will try to include

- Understand the new schedule changes
- List the process to perform catch-ups for overdue immunisation
- Clarify how to follow cold chain procedure and packing esky in an emergency
- How to perform recall and reminders, with people who identify as Aboriginal and Torres Strait Islander
- Health promotion strategies concerning vaccine preventable diseases

Diabetes WA

- Explain the importance of the patient-centred approach to diabetes management
- Outline the services Diabetes WA offers patients living with Diabetes, available FREE to NDSS registrants
- Describe referral processes to Diabetes WA education programs

Cervical Cancer Screening

Cancer screening can help protect your health through early detection.

Cervical screening in Australia has changed. The National HPV Vaccination Program coupled with the new Cervical Screening Test is expected to reduce the number of women diagnosed with cervical cancer by up to 36%. Join Kay Morton (Education and Training Officer WACCPP) for a “HOT TOPIC” update with a focus on the evidence base for the key changes to the National Cervical Screening Program.

Clarify how to

- Transition patients across to the new program

Promote

- Self-collection

Be clear about the function of

- The national Cancer Screening Register
- Your role in recall and reminder
