GP Educational Event

Saturday, 18 May 2019

Midland Physician Service: Postgraduate Day

Masterclass on Chronic Disease in General Practice

ST JOHN OF GOD
Midland Public & Private
Hospitals

Event information

The event presents a panel of highly qualified specialists to provide the latest information on a range of chronic diseases. The program has been designed for general practitioners to actively participate in roundtable discussions and case studies based on common chronic diseases that are encountered on a daily basis in general practice.

In addition, the event provides the opportunity for GPs to “ask the expert” about a range of topics to assist with managing patient care.

Date:

Saturday 18 May 2019

Time:

8:30am-4:30pm

Venue:

Level 1, Conference Centre
St John of God Midland Public & Private Hospitals
1 Clayton Street, Midland

3:05pm	Afternoon tea
3:15pm	Roundtable session
4:05pm	Summation lecture
4:30pm	End of session

Learning outcomes:

Upon completion of this education session participants should be able to:

- Identify triggers for re-referral of patient with chronic malignancy back to their oncology specialists.
- Choose appropriate anticoagulants for cardiology patients and determine length of treatment for complications, such as pulmonary embolism.
- Demonstrate knowledge of red flags and stratified management of reflux disease refractory to first line treatment.
- Identify level of risk in renal disease and urgency of referral with clear understanding of which tests and imaging modalities are required for those urgent reviews.
- Confidently prescribe second and third line diabetic medications for Type 2 Diabetes Mellitus patients in line with current guidelines.

Roundtable sessions

GPs will rotate amongst roundtables, which will include discussions and case studies provided by specialists, as listed below:

Specialists	Speciality & topic
Dr Tony Calogero Dr Sung-Kai Chui	Medical Oncology and Haematology “Diagnostic decisions in chronic malignancy”
