

Coronavirus (COVID-19)

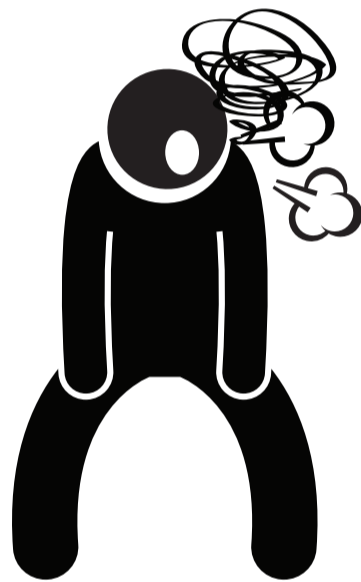

Coronavirus (Covid-19) is a new sickness spreading around the world.

Symptoms can include:

Cough

Difficulty breathing

Sick with fever

Call the clinic or hospital first if you feel sick with fever, or have difficulty breathing, and have been in close contact with someone with Coronavirus, or if you have recently been any place where Coronavirus has spread.

Coronavirus is spread by sick people sneezing and coughing, so:

Cover your sneeze and cough

Wash hands

Keep at least 2 big steps away from people if you're sick

Try not to touch face
