

# Population Health 2021/22 Report Card

WA Primary Health Alliance aims to improve the health of the entire population and to reduce health inequities among population groups. This report card shows how we are tracking in Western Australia in 2021/22 against key PHN Performance Outcomes and Indicators relating to population health.

## Treatment Services

**2,402** clients accessed one of our funded chronic disease services

Encouraged people with urgent care needs to attend one of WA's 108 **GP Urgent Care** Network clinics

**Outcome** Addressing Needs: Fewer potentially preventable hospitalisations

## COVID-19

**4,120** COVID-19 related enquiries to our Practice Assist service, comprising **67%** of enquiries for the year

**15** COVID-19 specific webinars and training delivered

**5** COVID-19 HealthPathways developed

**11** GP Respiratory Clinics established with our support, completing **32,646** appointments

**Outcome** Quality care: PHNs support health care providers to address factors impacting population health

## Population Health Programs

### Healthy Weight

Launched **SHAPE** (Supporting Holistic and Person centered weight Education) website. SHAPE provides primary healthcare providers with the tools, education and resources to safely and sensitively support patients with weight concerns to improve their health and wellbeing outcomes. This is an initiative of the WA Healthy Weight Action Plan.

### Chronic Heart Failure

Established a Chronic Heart Failure Expert Reference group to inform, guide and support the development and delivery of our Chronic Heart Failure Pilot project.

### Immunisation and Cancer Screening

Supported general practices to **improve child, adolescent, and adult vaccination coverage** across WA and **encourage the promotion of and participation in Australia's three cancer screening programs** (breast, bowel, cervical) among their patient population.

**Outcome** Quality care: PHNs support health care providers to address factors impacting population health
