# **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 7: Stepped care approach

**Other Program Key Priority Area Description** 

#### Aim of Activity \*

To support general practitioners (GPs) and clinicians in the primary care setting, using the stepped care model to select the most appropriate, least intensive level of care, for a person presenting for mental health assistance by using the Initial Assessment and Referral (IAR) tool. This will contribute to achieving nationally consistent levels of care for people presenting with similar conditions.

# Description of Activity \*

The Program Guidance for Primary Health Network Initial Assessment and Referral Training and Support Officers (Dec 2021) guide the activity.

An IAR Training & Support Officer (TSO) will lead the IAR stepped care model implementation by:

- Securing a platform to host required e-learning.
- Establishing a central administration and payment process to manage training bookings and incentive payments to individual GPs.
- Identifying and targeting training participants including GPs, Head to Health services, Aboriginal Community Controlled Health Organisations, related commissioned services and building relationships with all stakeholders.

- Developing a communication and marketing plan to promote training opportunities.
- Facilitating access to Part 1 (e-learning) training for training participants.
- Delivering and evaluating Part 2 (face to face/ virtual) training and paying participating General Practitioners as per incentive payment schedule.
- Communicating avenues to promote education and resources to the primary care workforce on the value and impact of IAR.
- Promoting the Communication and Marketing Plan (June 2023), with Training to commence as per the project plan, in 2023.
- Collecting, collating and summarising data for 12-month and other mandated reporting.

Existing, Modified or New Activity \*

Modified

# **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 1: Low intensity mental health services

**Other Program Key Priority Area Description** 

# Aim of Activity \*

The aim of this activity is to provide easily accessible low intensity, structured brief psychological treatments for individuals who have, or are at risk of, mild mental disorder (primarily anxiety and depression), and who do not require more intensive psychological services.

Low intensity services aim to provide age-appropriate services that are tailored to meet the individual's needs and are a core component of a stepped care approach. By providing structured early intervention services through in-person (including groups) and virtual clinic options, individuals from underserviced groups may obtain improved access to free low intensity psychological treatments.

# **Description of Activity \***

Low intensity treatment services will be delivered through a range of modalities including in person or web-based and telephone interventions, provided individually or in groups and be consistent with a stepped care approach.

The services are premised on being short-term and structured (manualised), that focus on skill development. Treatments delivered are to be based upon robust evidence such as found in the Australian Psychological Society's 2018 systematic review of psychological interventions. Low intensity services can be accessed with or without a referral from a general practitioner.

To enable services to develop manualised low-intensity treatments suitable for their treatment populations, WAPHA commissioned Prof. Peter McEvoy from Curtin University (one of the authors of the Oxford Handbook for low-intensity CBT) to produce a guidance manual that can be used to develop, standardise and validate low intensity treatment offerings (McEvoy, P., Landwehr, E., Pearcy, C., & Campbell, B. (2021). A clinician's guide to low intensity psychological interventions (LIPIs) for anxiety and depression. Western Australian Primary Health Alliance). This is available under open-source licensing (hard copy and electronic versions).

In addition to the clinician's guide, WAPHA will be commissioning the development of low-intensity treatment workbooks to guide clinicians and patients through treatment. The workbooks are being developed in consultation with the PHN cooperative for use across the PHN network. The workbooks will be appropriate for patients with low reading ages (12 years), contain 4 – 6 modules with clear and concise content that can be used by healthcare workers (not necessarily psychologists) to guide patients through evidence-informed strategies for anxiety and depression, social anxiety, low self-esteem, sleep, parenting skills training and anger management.

The services will be delivered in a cost-efficient manner by suitably qualified and skilled health professionals who will assess and target the intensity of the service to meet the needs of the specified target group. These will include mental health competent registered psychologists, registered nurses, occupational therapists and social workers, Aboriginal and Torres Strait Islander health workers (suitably qualified and supervised) and suitably credentialled health professionals and/or suitably qualified, trained staff who are supervised by a suitably credentialled health professional.

The commissioned, low intensity treatment services include:

- telephone and web-based services
- in person interventions offered as part of community treatment services
- psychological treatment services in Residential Aged Care Facilities
- services provided through headspace

Orygen Digital's Moderated Online Social Therapy (MOST) clinical and peer moderated web-platform is designed to supplement face-to-face clinical psychotherapies (including telehealth), or while waiting to access routine psychological treatments. Using persuasive technology, it provides young people access to social networking, psychoeducational therapy units and a forum to talk about and crowdsource solutions to personal issues. WA Primary Health Alliance (WAPHA) is examining options to progressively make MOST available at-scale in WA over the next three years, including from headspace Centres.

Independent Community Living Australia Limited's (ICLA) eFriend Peer Support Intervention Service uses technology and innovative models of care to increase access to low intensity, early intervention mental health services for people with, or at risk of, mild mental illness, to prevent escalating acuity. The use of the two digital intervention sets in combination Peer Support Intervention (PSI) and Psychological Therapy (PT), to greatly increase the reach of peer support beyond traditional mental health settings as well as extend the evidence-base and treatment efficacy of MindSpot GP psychological treatment.

As further guidance and information is released, the activities required of the commissioned services may be refined and modified. This will be conducted in partnership and collaboration with relevant stakeholders. If it is determined that the current service provider does not have the capacity or capability to continue/undertake the service, then WAPHA will consider the most appropriate commissioning method and approach the market to support or find another suitable service provider. Services will consistently demonstrate communication and engagement that is respectful of cultural differences and tailored to meet specific cultural needs and expectations. This may include nuanced approaches to enhancing access including culturally tailored entry points.

This activity will include a focus on strengthening the interface between general practice and commissioned service providers. WAPHA will continue to engage with general practice to increase awareness and knowledge of WAPHA's commissioned activities. WAPHA will also ensure commissioned service provider accountability re maintaining a collaborative approach with local general practices.

WAPHA has developed a Cultural Competency Framework, an LGBTIQA+ Equity and Inclusion Framework, a Multicultural Competency and Capability Framework and an Aboriginal Cultural Capability Framework, which encompasses cultural awareness, cultural competency and cultural safety. These frameworks will help identify opportunities to support the improvement of cultural competence and clinical safety of services. The PHN will reflect on current practice, identify and support areas that will improve cultural safety for communities, and develop cultural competence within WAPHA and external stakeholders including commissioned services, resulting in better health and wellbeing outcomes for Aboriginal, CALD and LGBTQIA+ communities.

# **Activities**

- Plan for the provision of low intensity mental health services as part of a stepped care approach to joint regional mental health and suicide prevention planning.
- Support appropriate intake, assessment and referral protocols, including self-referral, to target low intensity services to those who would benefit from them.
- Promote low intensity services as an effective service choice to both professionals and to the community, including digital low intensity services available through Head to Health.
- Commission evidence-based, accessible and efficient low intensity services adapted as needed to address the priority needs for each WA PHN.
- Support appropriate intake, assessment and referral protocols, including self-referral, to target low intensity services to those who would benefit from them.
- Promote low intensity services as an effective service choice to both professionals (with a particular emphasis on General Practices measured by referrals from this source) and to the community, including digital low intensity services available through Head to Health.
- Review, evaluate and implement quality improvement initiatives regarding the effectiveness of existing integrated models, with an emphasis on enhancing the interface and referral pathways between commissioned services and general practice.
- Develop ongoing capacity to house and manage Low Intensity therapist manuals, including their development and improvement.
- Ensure services offer a culturally safe response to the needs of Aboriginal and Torres Strait Islander people, in line with the principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the diverse needs of Culturally and Linguistically Diverse (CALD) and Lesbian, Gay, Bisexual, Trans, Intersex and Queer (LGBTIQ+) people.
- Program direction and oversight processes developed and maintained.
- Support continuous program improvement.

#### **Priority locations**

Services will be commissioned in locations where there are existing building blocks, such as a defined minimum set of in-situ services, including general practice.

To help determine priority locations, a multiple criteria decision analysis, aligned to the PHN Commonwealth program guidance, will be implemented. WAPHA will utilise a socio-technical decision support and planning methodology, combining a data-driven technical value for money analysis with stakeholder engagement and discussion, to identify and rank priority locations and interventions for commissioning.

WAPHA's placed based teams will provide information on existing local systems, collaboratives, and partnerships. Place-based decision making will also be informed by

WAPHA's needs assessments, which will include population health analysis and consultation with clinicians, community, service providers and partner agencies. This will be complemented by the quantitative and qualitative data of partner agencies. Due diligence and environmental scanning will be undertaken in consultation with State Government partners, to ensure a location is not overserviced and/or services are not duplicated. WAPHA has partnership arrangements and well-established communication channels with the Health Service Providers, the Mental Health Commission, Department of Health, Aboriginal Health Council of WA and industry peaks, which will help enable this process.

#### **Priorities**

Priority	Page reference
There is a need for culturally appropriate mental health services for Aboriginal populations. (Metro)	34
Support Aboriginal people to navigate the primary care system and access appropriate services. (Metro)	34
Ensure integrated and stepped care services are	18

available for people experiencing mental health issues, including younger people. (Metro)	
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18

# **Activity Demographics**

# **Target Population Cohort**

Individuals aged 16 and above at risk of, or experiencing, mild mental ill-health; from an underserviced population; unable to equitably access MBS treatments due to overlapping factors indicating disadvantage (eg, low income or inability to access services during business hours, job insecurity, material disadvantage, limited personal resources, social isolation, poor health literacy, other social, economic, cultural and personal reasons); and/or experiencing locational disadvantage.

Whilst this activity is not Indigenous specific, the PHN is guided by the principles of the Gayaa Dhuwi (Proud Spirit) Declaration, which will be embedded in low intensity service models and adhered to in the development and delivery of services. Commissioned services will be expected to ensure cultural safety and equality of care for Aboriginal and Torres Strait Islander people (including Aboriginal Health Workers employed within these services).

**Indigenous Specific Comments** 

# Coverage

**Whole Region** 

Yes

# **Activity Consultation and Collaboration**

# Consultation

WA Primary Health Alliance has undertaken a wide range of stakeholder consultation and engagement activities to support the provision of Low Intensity services in the Perth South PHN region. These have been conducted at both a national, state, regional and local level, and are used to inform, strengthen and build capacity and capability in the services that have been commissioned and to ensure that the best use is made of the available resources and investment in mental health services.

Key stakeholders for this activity include:

- Consumers
- Commissioned service providers

- GPs and general practices
- Health Service Providers
- WA Mental Health Commission
- Local Mental Health and Social Service providers
- Orygen
- MQ Health (Macquarie University)
- Centre for Clinical Interventions (CCI)
- Curtin University

In addition to those listed above, the Perth South PHN region consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level. These include:

- Australian Government Department of Health and Aged Care
- WA Country Health Services
- Women and Newborn Health Service
- Child and Adolescent Health Service
- Royal Australian College of General Practice
- WA Local Governments
- Aboriginal Health Council of WA
- Aboriginal advisory groups
- Australian Medical Association (WA)
- consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

All collaborative activities are aimed at ensuring the commissioning of effective and sustainable face to face and virtual low intensity services, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving consumers and carers where possible.

The role of the key stakeholders in the implementation of this service will be:

- WA Mental Health Commission and Child and Adolescent Health Service, who will support the building of capability and will promote integration across the sector.
- General practitioners who will support the development and strengthening of referral pathways across primary care, and to promote the Head to Health website.
- The Aboriginal Health Council of WA and Aboriginal Medical Services who will assist to promote and strengthen culturally appropriate and accessible primary mental health care services.
- PHN commissioned service providers who will strengthen partnerships and integration of services into the stepped care strata.

**Activity Title \*** 

MH 3000 - Psychological Therapies for Underserviced Groups

Existing, Modified or New Activity \*

Modified

# **Activity Priorities and Description**

# Program Key Priority Area \*

Mental Health Priority Area 3: Psychological therapies for rural and remote, under-serviced and / or hard to reach groups

# Other Program Key Priority Area Description

# Aim of Activity \*

The aim of the commissioned psychological therapy services is to provide short term, evidence-based structured interventions for people with a diagnosable mild or moderate mental illness or for people who have attempted, or are at low risk of, suicide and self-harm and who require follow-up within seven days of referral (i.e. risk level deemed acceptable for primary care-based intervention).

Age and culturally appropriate psychological therapy services are a core component of the stepped care approach and will aim to increase access to free treatment for underserviced populations with linkages to other services; thereby aiming to meet an individual's clinical needs and improve their mental health.

The Perth South PHN will aim to:

- Integrate psychological therapy services into a stepped care.
- Consolidate and strengthen linkages to other services.
- Address service gaps and optimise equitable access to psychological therapies for underserviced groups.
- Strengthen local regional mental health and suicide prevention planning.
- Commission services that meet the needs of the target group and use innovative service delivery models.
- Ensure clinical governance of commissioned services is in situ.
- Promote partnerships with GPs, other stakeholders and consumers.

- Foster linkages to local crisis services and pathways.
- Promote evidence-based practice and the collection of data that demonstrates impact of interventions.

For residents of RACFs, services will also:

- Be planned and implemented in a way which considers the role, responsibilities and operational requirements of RACFs.
- Use an older adult evidence-base and be responsive to the needs of older people.
- Improve the identification of those at heighted risk of suicide, particularly men, and respond accordingly.

# **Description of Activity \***

#### Background

Psychological treatments are premised on being a short term (up to 10 individual and 10 group sessions) cost effective, evidence-based, structured (follow a defined treatment protocol) psychological treatments. All commissioned psychological treatments require a GP Mental Health Plan (or equivalent) or referral from a psychiatrist or paediatrician, where the treatment plan is primarily based around the delivery of psychological therapy by one or more health professionals.

Psychological therapy services are to be protocol based supported by evidence as found in the Australian Psychological Society's 2018 systematic review of psychological interventions (Australian Psychological Society, Evidence-based psychological interventions in the treatment of mental disorders: A review of the literature. 2018) and delivered by suitably qualified mental health professionals as part of a team approach (involving the patient's GP) to primary mental health care.

Services will be delivered by:

- clinical psychologists
- mental health competent registered psychologists, registered nurses, occupational therapists and social workers
- mental health competent Aboriginal and Torres Strait Islander health workers.

The psychological therapy services will be designed to complement the role of the Better Access funded MBS psychological services (i.e., up to 10 individual and 10 group sessions per year) and provide a level of service intensity that is commensurate with the clinical needs of the individual.

MindSpot GP, a state-wide GP referral option providing telephone and web-based assessment and evidence-based treatment, will play an important role in ensuring parity of equity across the Perth South PHN to psychological therapy services for all those who are in need and not able to access face-to-face services. A MindSpot GP intake assessment is deemed equivalent to a GP Mental Health Care Plan for access to PHN commissioned psychological therapies. This will assist in providing an integrated model of care and fidelity of the intervention, regardless of the location where an individual is accessing it.

It is proposed that the following will continue to be commissioned:

- Face to face interventions offered as part of community treatment services.
- Telephone and web-based services through the MindSpot GP service.
- Psychological therapy services for residents of RACFs.

Commissioned service provision will be person centred, trauma informed and include an emphasis on the holistic treatment of physical and mental health issues.

Services will consistently demonstrate communication and engagement that is respectful of cultural differences and tailored to meet specific cultural needs and expectations. This may include nuanced approaches to enhancing access including culturally tailored entry points.

# Activities:

- Plan services to meet the needs of underserviced groups in each PHN region for psychological therapies.
- Commission services to deliver evidence based psychological therapies to underserviced groups in a way which complements MBS based psychological interventions, and where possible adapts to the needs of these groups.
- Promote partnerships with GPs, consumers and other key stakeholders to support addressing the needs of underserviced groups, including establishing appropriate referral pathways.
- Ensure quality and efficiency of commissioned services.
- Review and monitor service delivery and collect data on provision of psychological therapy services.
- Ensure services offer a culturally safe response to the needs of Aboriginal and Torres Strait Islander people, in line with the principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the diverse needs of Culturally and Linguistically Diverse (CALD) and Lesbian, Gay, Bisexual, Trans, Intersex and Queer (LGBTIQ+) people.

- Program direction and oversight processes developed and maintained.
- Support continuous program improvement.

# Activity coverage

Services will be commissioned in locations where there are existing building blocks, such as a defined minimum set of in-situ services, including general practice.

To help determine priority locations, a multiple criteria decision analysis, aligned to the PHN Commonwealth program guidance, will be implemented. WAPHA will utilise a socio-technical decision support and planning methodology, combining a data-driven technical value for money analysis with stakeholder engagement and discussion, to identify and rank priority locations and interventions for commissioning.

WAPHA's placed based teams will provide information on existing local systems, collaboratives, and partnerships. Place-based decision making will also be informed by WAPHA's needs assessments, which will include population health analysis and consultation with clinicians, community, service providers and partner agencies. This will be complemented by the quantitative and qualitative data of partner agencies.

Due diligence and environmental scanning will be undertaken in consultation with State Government partners, to ensure a location is not overserviced and/or services are not duplicated. WAPHA has partnership arrangements and well-established communication channels with the Health Service Providers, the Mental Health Commission, Department of Health, Aboriginal Health Council of WA and industry peaks, which will help enable this process.

#### Data collection

The PHN will ensure that effective monitoring and evaluation systems and processes are in situ to obtain data regarding the:

- Proportion of the regional population receiving commissioned psychological therapies delivered by mental health professionals. The target is a 5% growth on the previous financial year.
- Demonstrated clinical improvement as measured by outcomes for people receiving PHN-commissioned mental health interventions.
- Average cost of the psychological therapy interventions per service contacts and episode of care.
- Completion rates for the clinical outcome measures reported in the PMHC MDS.
- Proportion of PHN annual flexible funding allocated to psychological therapies.
- Proportion of people referred to PHN commissioned services due to a recent suicide attempt or because they were at risk of suicide, followed up within 7 days of referral. (Target 100%).
- Proportion of mental health care episodes with valid clinical outcome measures recorded at the episode start and end. The target for this is 70%.

# **Needs Assessment Priorities \***

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Ensure integrated and stepped care services are available for people experiencing mental health issues, including younger people. (Metro)	18
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18

**Activity Demographics** 

#### **Target Population Cohort**

The psychological therapy services will be targeted at people who are:

- Diagnosed with mild to moderate mental illness and who are not clinically suited to lower intensity services requiring self-referral.
- At low risk of suicide.
- Living with a severe mental illness and who may benefit from short term, focused psychological intervention.
- From an underserviced population.
- Unable to equitably access MBS treatments due to overlapping factors indicating disadvantage, including:
- o low income or inability to access services during business hours
- o job insecurity
- o material disadvantage
- o limited personal resources
- o social isolation
- o poor health literacy
- o other social, economic, cultural and personal reasons
- Living in locationally disadvantaged communities

#### Consultation

WA Primary Health Alliance has undertaken a wide range of stakeholder consultation and engagement activities to support the provision of psychological therapy services in the Perth South PHN. These have been conducted at both a national, state, regional and local level, and are used to inform, strengthen and build capacity and capability in the services that have been commissioned and to ensure that the best use is made of the available resources and investment in mental health services.

The Perth South PHN consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level. These include:

- Australian Government Department of Health.
- National Mental Health Commission.
- WA Mental Health Commission.
- Child and Adolescent Health Service.
- Women and Newborn Health Service.
- GPs.
- Royal Australian College of General Practice.
- WA Local Governments.
- · Aboriginal Health Council of WA.

- Aboriginal Advisory Groups.
- Australian Medical Association (WA).
- consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

All collaborative activities are aimed at ensuring the commissioning of effective and sustainable face to face and virtual psychological therapy services, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving consumers and carers where possible.

The role of the key stakeholders in the implementation of the psychological therapy service will be:

- GPs who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- PHN commissioned service providers who will strengthen working relationships to enhance service delivery and clinical governance.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will promote and strengthen culturally appropriate and accessible primary mental health care services.
- WA Mental Health Commission, the Child and Adolescent Health Service, Women and Newborn Health Service, and the WA Country Health Service will build capability and promote integration across the sector.

Existing, Modified or New Activity \*

Modified

# **Activity Priorities and Description**

# Program Key Priority Area \*

Mental Health Priority Area 3: Psychological therapies for rural and remote, under-serviced and / or hard to reach groups

# **Other Program Key Priority Area Description**

# Aim of Activity \*

The activity aims to target the mental health needs of people living in residential aged care facilities (RACFs).

The outcomes that this Activity is seeking to achieve are:

- 1. To promote better mental health outcomes for RACF residents; and
- 2. Offer significant benefits to RACF staff associated with the mental health and wellbeing of residents.

# **Description of Activity \***

The Activity targets the mental health needs of people living in residential aged care facilities (RACFs). The service provides RACF residents with mental illness access to evidence-based psychological therapies that are person centred and tailored to meet residents" needs against a stepped care framework. The service provides in-reach [psychological therapy to residents with a diagnosis of mental illness or assessed to be at risk of mental illness. Service provision builds on already existing relationships and arrangements for commissioning psychological services. Guidance for intervention is provided by the National Institute of Clinical Excellence and Beyond BLue's 'What works to promote emotional wellbeing in older people'.

The services target residents with mild to moderate symptoms of mental illness. However, residents with severe mental illness, who are not more appropriately managed by a State government older persons mental health service, and who would benefit from psychological therapy are not excluded from the service. A medical diagnosis of mental illness by a general practitioner or

psychiatrist is required to ensure that symptoms of cognitive decline, dementia or delirium are not mistaken for mental illness, and to ensure that physical Illness, and medication needs are considered in the overall care plan of the individual. For this activity, the definition of mental Illness is consistent with that applied to MBS Better Access items. People with dementia are included if they also have a comorbid mental illness such as anxiety or depression.

There are several priority sub-groups of residents who may have particular needs:

- 1. Residents with significant transition issues (beyond normal sadness and/or transition issues). These residents will be identified as experiencing adjustment disorders or abnormal symptoms of grief and loss, for whom early treatment may avert descent into a more serious mood disorder.
- 2. Residents with mild to moderate anxiety and/or depression.
- 3. Residents receiving treatment for mental illness prior to being admitted, which could not continue within the facility, and ensuring patient history is understood to support continuity of care.
- 4. Residents who may have experienced elder abuse or past or recent trauma.
- 5. Residents who, in addition to their mental illness, have a level of comorbid cognitive decline and/or dementia.
- 6. Residents from diverse and priority communities, including Aboriginal, lesbian, gay, bisexual, transgender, intersex, queer (LBGTIQ), or culturally and linguistically diverse (CALD) groups, for whom there may be additional barriers to diagnosis and care.

#### Data collection

The Perth South PHN will ensure that effective monitoring and evaluation systems and processes are in situ to obtain data regarding the proportion of the regional population receiving commissioned psychological therapies delivered by mental health professionals; clinical outcomes of these services; average cost of the psychological therapy interventions per service contacts and episode of care; completion rates for the clinical outcome measures reported in the PMHC MDS. The approach taken by the PHN to capture this data includes formally training new commissioned service providers in the collection and submission of data to the PMHC-MDS, in accordance with the PMHC-MDS Specifications and Data Definitions and directing the service providers to the suite of support resources available.

Existing, Modified or New Activity \*

Modified

# **Activity Priorities and Description**

# Program Key Priority Area \*

Mental Health Priority Area 4: Mental health services for people with severe and complex mental illness including care packages

# Other Program Key Priority Area Description

# Aim of Activity \*

To improve the access, provision and coordination of treatment and support for individuals with severe mental illness, particularly those individuals with concurrent physical illness including the physical health consequences of prescribed treatments, who are most appropriately managed in primary care by general practitioners (GP) within specified locations.

#### The activity is to support:

- General practitioners managing individuals with severe mental illness who would benefit from additional clinical support and needs-based care planning and coordination who can be appropriately supported in a primary care setting as part of a stepped care approach.
- The implementation of the primary care relevant actions of the Equally Well National Consensus Statement for improving the physical health and wellbeing of people living with mental illness in Australia (National Mental Health Commission (NMHC), Equally Well Consensus Statement: Improving the physical health and wellbeing of people living with mental illness in Australia, Sydney NMHC, 2016).

#### The PHN will:

• Support general practitioners and their patients with severe mental illness within specified locations whose needs can most appropriately be met in primary care settings (i.e. individuals who do not require more specialised and intensive service delivery

within the state and territory managed specialised mental health system). This includes:

- o Working collaboratively with all related service providers to improve the integration and local coordination of care.
- o Consolidating and strengthening relationships and linkages with providers of healthcare, social and other related services including alcohol and other drugs services.
- o Promoting the use of multi-agency care plans.
- o Planning for the provision and support of services for people across the lifespan, including youth (from 18 years).
- o Promoting referral pathways for the physical health needs of people with severe mental illness, particularly via general practitioners.
- o Establishing linkages between clinical services and psychosocial support services.
- Work with general practitioners and their patients, carers, and families to design and implement Equally Well care pathways within specific locations including:
- Requiring all in-scope commissioned mental health providers to screen for physical health conditions that people with mental illness are at higher risk of developing.
- o Requiring all in-scope commissioned mental health services incorporate pathways to refer to other services that provide prevention and lifestyle interventions, including interventions aimed at improving diet and increasing physical activity. o Ensuring general practitioners and other in scope professionals in commissioned services have access to the training and support they need to provide person-centred, effective, and coordinated care to people with comorbidities.
- o Ensuring people with severe mental illness and their carers have access to / are empowered to use information on physical health problems, managing medications and their side-effects, and the range of care and treatment options available to them. o Ensuring the Equally Well Consensus Statement actions are a priority consideration for inclusion in joint regional mental health and suicide prevention plans.

#### **Description of Activity \***

#### Background

Approximately 3.1% of the adult population are estimated to have severe mental illness. The Fifth National Mental Health and Suicide Prevention Plan highlights the need for greater coordination and support of people with severe mental illness and complex needs at a regional level. There is an increasing focus on the importance of ensuring the physical health needs of people with severe mental illness are identified and addressed. Compared to the general population, people with a severe mental illness are: six times more likely to have a dental health issue; six times more likely to die of cardiovascular disease; four times more likely to die of respiratory disease; two to four times more likely to die of infectious diseases; likely to die 20 years earlier.

Perth South PHN will work with general practitioners to develop approaches that increase the efficiency and effectiveness of medical care for individuals with severe mental illness particularly those individuals with concurrent physical illness whose needs can most appropriately be met in primary care settings, including individuals taking Clozapine. This involves two related activities:

1. Funding the provision of clinical care coordination within specified locations.

- Clinical care coordination will be premised upon a GP-led model using a single, standardised multi-agency GP Mental Health Treatment Plan and premised on meeting the individual's needs and preferences. Services will be personalised and recovery focused. This will include:
- o initial and ongoing assessment;
- o coordination of treatment and support services that address mental and physical health issues, including the mental and physical consequences of psychoactive substance use, particularly alcohol;
- o liaison with an individual's support network;
- o monitoring progress and treatment compliance (including undertaking routine mental state and physical health checks);
- o tracking and reporting progress and outcomes;
- o providing health literacy and education to individuals, family and carers as appropriate.
- o proactive management of clinical deterioration including the involvement of family and carers.
- Clinical care coordination services for people with severe mental illness will be delivered by mental health competent, suitably skilled and qualified registered nurses working within the scope of their practice and the expectation that the same nurse will provide the nursing care requirements to the extent possible for any individual.
- 2. WA Primary Health Alliance (WAPHA) will fund work with general practitioners to develop localised approaches that increase the efficiency and effectiveness of medical care for individuals with severe mental illness and concurrent physical health conditions whose needs can most appropriately be met in primary care settings, including individuals taking Clozapine. This will include:
- o Requiring all in-scope commissioned services incorporate pathways to refer to other services that provide prevention and lifestyle interventions, including interventions aimed at improving diet and increasing physical activity.
- o Ensuring general practitioners and other in scope professionals in commissioned services have access to the training and support

they need to provide person-centred, effective, and coordinated care to people with comorbidities.

o Ensuring people with mental illness and their carers have access to /are empowered to use information on physical health problems, managing medications and their side-effects, and the range of care and treatment options available to them. o Ensuring the Equally Well Consensus Statement action are a priority consideration for the Joint Regional Plan for Integrated Mental Health and Suicide Prevention Services.

As further guidance and information is released, the activities required of the commissioned services may need to be refined and modified. This will be conducted in partnership and collaboration with the commissioned service providers. If at any point it is determined that the current service provider does not have the capacity or capability to continue/undertake the service, WAPHA will consider the most appropriate commissioning method and approach the market to support or find another suitable service provider.

#### Activities

- Plan for the integrated provision of services for people with severe mental illness in the region, including children and young people.
- Commission clinical care coordination for people with severe mental illness.
- Commission high intensity primary mental health services to address service gaps for people with severe mental illness who need them.
- Support implementation of the primary care relevant actions of the Equally Well National Consensus Statement for improving the physical health and wellbeing of people living with mental illness in Australia
- Co-lead the development of joint regional Mental Health and Suicide Prevention Plans with state government partners and other key stakeholders.
- Work with general practice and state government partners to reduce stigma and establish collaborative care mechanisms between specialist mental health services, general practice and community services to support the early detection and treatment of physical illness, prevention of chronic disease and promotion of a healthy lifestyle for people experiencing severe mental illness.
- Establish links between clinical services and psychosocial support for people with severe mental illness.
- Coordinate services for people with severe mental illness who are supported in primary health care, particularly those with complex needs.
- Promote the use of single multiagency care plans.
- Supplement psychological services available through the MBS.
- Ensure pathways for severe mental illness include assessment, treatment, and referral advice concerning co-occurring physical illness, lifestyle factors (diet/exercise/smoking), alcohol and drug use, and associated medication effects in HealthPathways.
- Ensure services offer a culturally safe response to the needs of Aboriginal and Torres Strait Islander people, in line with the principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the diverse needs of Culturally and Linguistically Diverse (CALD) and Lesbian, Gay, Bisexual, Trans, Intersex and Queer (LGBTIQ+) people.
- Program direction and oversight processes developed and maintained.
- Support continuous program improvement.
- Review, evaluate and implement quality improvement initiatives regarding the effectiveness of existing integrated models, with an emphasis on enhancing the interface and referral pathways between commissioned services and general practice.

#### **Priority locations**

Services will be commissioned in locations where there are existing building blocks, such as a defined minimum set of in-situ services, including general practice.

To help determine priority locations, a multiple criteria decision analysis, aligned to the PHN Commonwealth program guidance, will be implemented. WAPHA will utilise a socio-technical decision support and planning methodology, combining a data-driven technical value for money analysis with stakeholder engagement and discussion, to identify and rank priority locations and interventions for commissioning.

WAPHA's placed based teams will provide information on existing local systems, collaboratives, and partnerships. Place-based decision making will also be informed by WAPHA's needs assessments, which will include population health analysis and consultation with clinicians, community, service providers and partner agencies. This will be complemented by the quantitative and qualitative data of partner agencies. Information and data regarding general practices (including previous involvement with commissioned services, accreditation, registration with MyMedicare etc) will be taken into consideration.

Due diligence and environmental scanning will be undertaken in consultation with State Government partners, to ensure a location is not overserviced and/or services are not duplicated. WAPHA has partnership arrangements and well-established

communication channels with the Health Service Providers, the Mental Health Commission, Department of Health, Aboriginal Health Council of WA and industry peaks, which will help enable this process.

#### Data collection

The PHN will ensure that effective monitoring and evaluation systems and processes are in situ to obtain data regarding:

- Proportion of regional population receiving PHN-commissioned clinical care coordination for people with severe and complex mental illness.
- Average cost of PHN-commissioned clinical care coordination for people with severe and complex mental illness
- Proportion of PHN annual flexible funding allocated to low intensity services, psychological therapies and services for people with severe and complex mental illness.
- Enhanced clinical outcomes for people receiving PHN-commissioned mental health interventions.
- Average cost of low intensity interventions per service contact and episode of care.
- Completion rates for clinical outcome measures reported in the PMHC-MDS.
- Proportion of PHN annual flexible funding allocated to low intensity services.

#### Needs Assessment Priorities \*

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Ensure integrated and stepped care services are available for people experiencing mental health issues, including younger people. (Metro)	18
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18
Improve coordinated and integrated care for people experiencing complex and severe mental health who can be managed in within primary care settings. (Metro)	18

# **Activity Demographics**

# **Target Population Cohort**

Individuals with severe mental illness particularly those individuals with concurrent physical illness who can most appropriately be managed in primary care setting.

Whilst this activity is not targeted to Aboriginal populations, the PHN supports the principles of the Gayaa Dhuwi (Proud Spirit) Declaration, which will be embedded in service models and adhered to in the development and delivery of services. Commissioned services will be expected to ensure cultural safety and equality of care for Aboriginal and Torres Strait Islander people (including Aboriginal Health Workers employed within these services).

# In Scope AOD Treatment Type \*

# Indigenous Specific \*

Yes

# **Activity Consultation and Collaboration**

#### Consultation

The PHN has undertaken a wide range of stakeholder consultation and engagement activities to support the provision of mental health services for people with severe and complex mental illness in the Perth South PHN region. These have been conducted at both a national, state, and local level, and are used to inform, strengthen, and build capacity and capability in the services that have been commissioned and to ensure that the best use is made of the available resources and investment in mental health services.

Key stakeholders for this activity include:

- Consumers
- Commissioned service providers
- GPs and general practices
- Health Service Providers
- WA Mental Health Commission
- Local MH and Social Service providers
- Orygen
- MQ Health (Macquarie University)
- Centre for Clinical Interventions (CCI)
- Curtin University
- Australian Government Department of Health and Aged Care
- The Office of the Chief Psychiatrist
- Child and Adolescent Health Service
- Aboriginal Health Council of WA
- General practitioners
- Aboriginal advisory groups
- District Health Advisory Councils
- Consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

All collaborative activities are aimed at ensuring the commissioning of effective and sustainable care coordination services, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving consumers and carers where possible.

The role of the key stakeholders in the implementation of this service will be:

- WA Mental Health Commission and Child and Adolescent Health Service, who will support the building of capability and will promote integration across the sector.
- General practitioners who will support the development and strengthening of referral pathways across primary care, and to promote the Head to Health website.
- The Aboriginal Health Council of WA and Aboriginal Medical Services who will assist to promote and strengthen culturally

appropriate and accessible primary mental health care services.

- PHN commissioned service providers who will strengthen partnerships and integration of services into the stepped care strata.
- All collaborative activities are aimed at ensuring the commissioning of effective and sustainable mental health services for people with severe and complex issues, building capacity, capability, and integration across the sector, consolidating, and strengthening care pathways within primary care, and involving consumers and carers where possible.

# **Activity Priorities and Description**

# Program Key Priority Area \*

Mental Health Priority Area 5: Community based suicide prevention activities

# **Other Program Key Priority Area Description**

# Aim of Activity \*

To improve the care of individuals with high prevalence disorders (mostly anxiety and depression) who are at greater risk of suicide through systematic collaborative regional planning, co-design and service implementation and improvement strategies directly aimed at reducing suicide within communities

The Perth South PHN will aim to:

- Plan and commission regional activities that are integrated with mental health or alcohol and other drug services.
- Facilitate better links between discharge services and relevant primary mental health care services including general practice.
- Support an integrated whole of community approach to treatment and support for people with common mental disorders.
- Facilitate access to culturally appropriate, integrated services for Aboriginal people and communities.
- Partner and liaise with local Aboriginal people and Aboriginal Community Controlled Health Services and mainstream providers to plan, integrate and target local suicide prevention funding where possible.
- Engage people with lived experience where indicated.

# **Description of Activity \***

Perth South PHN will work locally to:

(i) Improve the capacity and capability of routine community gateways into healthcare, especially general practitioners and PHN

commissioned providers, to recognise and respond to suicide risk and suicidality that is evidence-based, culturally appropriate, available when help is needed, and connected to services based on an individual's needs. This will include the development of aftercare for those who have attempted suicide, with active pathways to GP-connected care and psychosocial support; (ii) Identify high-risk groups within localities;

(iii) Develop integrated community-based pathways into care.

Community based suicide prevention activities will be delivered by commissioned services across the Perth South PHN using an integrated and systems-based approach, in partnership with Local Health Networks (to be referred to as Health Service Providers herein) and other local organisations. Evidence-informed activities will focus on improving follow up support for those who have recently attempted suicide or clinically significant suicidal ideation, who present to primary or secondary care services.

The Perth South PHN will lead the co-creation of a agreements with general practice, regional health service providers, including state-based services, that details the follow-up care to individuals who have attempted suicide, to ensure that there is clarity regarding the responsibility for provision of this care.

The Perth South PHN will also work with local communities to improve the integration of care utilising the Alliance Against Depression (AAD) framework. The AAD strategy is programmatic and comprises a four-part community-based intervention focused on improving care and optimising treatment for individuals with depressive disorders and preventing suicidal behaviour. Key activities require engaging with general practitioners and community allied health practitioners (e.g. psychologists in private practice), health service providers and relevant agencies (such as headspace), public relation activities that destigmatise depression and talking about suicide, facilitating co-operation with domain-relevant stakeholders, and developing support pathways for high-risk individuals and their relatives, including after-care and post-vention services.

The activity will also strengthen joint regional planning and commissioning of suicide prevention activities that are integrated and linked to alcohol and other drug use, mental health, and social and emotional wellbeing activities. This will help build the capability of local providers in suicide prevention.

The Active Life-Enhancing Intervention (ALIVE) program is a service commissioned in PHN South, for people aged 25 and over at medium to high risk of suicide seeking help for acute emotional distress and crisis due to an episode of depression, bereavement or an adjustment disorder related to financial problems or relationship breakdown. The service provides timely, person-centred problem-solving support, wellness and distress management planning, supported connections and referrals for a period of up to three months.

Active Response Bereavement Outreach (ARBOR) is a proactive postvention support service commissioned in PHN South, providing short to medium term bereavement counselling and practical support to adults (18 years and over) bereaved by suicide.

An aftercare model of service is currently being developed in collaboration with the Mental Health Commission. The service will provide brief interventions, psychosocial support and case management for people who have made an attempt on their life or have experienced and/or are experiencing suicidal crisis. Once complete, this may reshape activities currently being delivered.

The PHN recognises the impact COVID-19 has had on the community, primary health care and commissioned service activity. With services having returned, monitoring and service impact assessment will continue, to ensure the PHN continues to meet the aims of the activity and the needs of the priority target groups.

# Data collection

The Perth South PHN will ensure that effective monitoring and evaluation systems and processes are in situ to obtain data regarding the proportion of people who were referred to a commissioned service due to a recent suicide attempt or were at risk of suicide and who were followed up within seven days of referral. The approach taken by the PHN to capture this data includes formally training new commissioned service providers in the collection and submission of data to the Primary Mental Health Care-Minimum Data Set (PMHC-MDS), in accordance with the PMHC-MDS Specifications and Data Definitions and directing the service providers to the suite of support resources available.

# **Activity Consultation and Collaboration**

#### Consultation

A wide range of stakeholder consultation and engagement activities are undertaken to support the provision of community-based suicide prevention in the Perth South PHN. These have been conducted to inform, strengthen and build capacity and capability in the community, commissioned services, and the sector and to ensure that the best use is made of the available resources and investment in mental health services.

Perth South PHN consults and engages a variety of stakeholders to ensure that all suicide prevention activities complement and add value to the impact and contribution of other state, national and regional activities. These include the Australian Government Department of Health and Aged Care, National Mental Health Commission, the WA Mental Health Commission, South Metropolitan Health Service and East Metropolitan Health Service, Child and Adolescent Health Service, Women and Newborn Health Service, general practitioners, WA Local Governments, the Aboriginal Health Council of WA, Aboriginal Advisory Groups, Telethon Kids Institute, The National Centre of Excellence in Youth Mental Health (Orygen), Metropolitan Clinical Councils, WA Network of Alcohol and other Drug Agencies and consumer and carer peak bodies and consumer associations.

#### Collaboration

All collaborative activities are aimed at ensuring the commissioning of effective and sustainable community-based suicide prevention activities, building capacity, capability and integration across the sector, consolidating and strengthening referral pathways within primary care, and involving consumers, carers and the community where possible.

The role of the key stakeholders in the design and implementation of the community-based suicide prevention activities will be:

- General practitioners who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will assist to promote and strengthen culturally appropriate and accessible primary mental health care services. WA Mental Health Commission and Health Service Providers who will assist to improve and inform best practice, develop strategic partnerships, support regional planning, provide leadership and engagement in the sector, build capability and promote integration across the sector.

# **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 8: Regional mental health and suicide prevention plan

**Other Program Key Priority Area Description** 

## Aim of Activity \*

Implement a systems-based approach to reduce the incidence and impact of suicidality.

Apply the European Alliance Against Depression (EAAD) systems-based approach to suicide prevention targeting communities of high need and populations identified at-risk of suicide or suicidal distress. This approach targets the primary mental health care sector, and in particular general practice, with GP-led depression management at the core of the strategy.

The PHN's primary objective will be to engage the primary care and mental health care workforce to improve their capacity and capability to identify and treat depression and prevent suicidal behaviour. This activity aligns directly to pillar 1 of the EAAD framework (Primary care and mental health care). Secondary to this, the PHN will collaborate with other national, state, and local community stakeholders within regions to identify existing suicide prevention plans and activities and look to commission activities that align across the EAAD framework, particularly where gaps are identified.

#### **Description of Activity \***

The Perth South PHN will recruit a Suicide Prevention Lead (SPL), to coordinate implementation of the following activities:

- Identification of communities of need and the at-risk populations within those communities, informed by data and consultation with stakeholders such as the Mental Health Commission (MHC).
- Map existing services/programs within communities against the European Alliance Against Depression (EAAD) 4-pillar intervention framework to identify gaps and options to value -add to existing activity.

- Identification and commissioning of time-limited community capacity building activities to fulfill above objectives, using evidence-based recommendations. Activities chosen will align with one of the four pillars of the EAAD framework.
- Collaborate with the WA MHC to identify existing activity and opportunities to value-add within communities where MHC Suicide Prevention Coordinators are located. This will reduce duplication of activities and enhance the working relationship between the two organisations.
- Collaboration with the Black Dog Institute to support and identify a community within the PHN that will benefit from a Capacity Building Workshop
- Participate in the Department of Health and Aged Care SPL Communities of Practice.
- Participate in the Black Dog Institutes Suicide Prevention Communities of Practice.
- Identify, connect with and recruit appropriate activities from The National Suicide Prevention Leadership and Support Program to support implementation within selected PHN communities.

#### Activities

- Review existing suicide prevention funded activity and develop a plan for the commissioning of integrated suicide prevention aftercare activities in primary care.
- Coordinate early intervention and suicide prevention activities and lead the development of an overarching implementation plan guiding the approach to community engagement, governance and commissioning.
- Undertake data analysis and research using the Suicide and Self Harm Monitoring System and data from the state/territory government to identify communities whether that be priority populations or geographic communities with the highest need for suicide prevention supports and services.
- Engage with the Department of Health and Aged Care and state/territory government to support integration of suicide prevention initiatives.
- Support the implementation and co-design of the measures under the National Mental Health and Suicide Prevention Agreement, specifically the rollout of universal aftercare.
- Engage with the National Aboriginal Community Controlled Health Organisation Culture Care Connect Program.
- Identify and promote peer support and mentorship programs for people with lived experience of suicide.
- Participate in the Community of Practice to develop processes for and coordinate regional reporting and evaluation of the targeted suicide prevention initiatives.
- Collaborate with other PHN Regional Suicide Prevention coordinators to contribute to national implementation priorities and resources.
- Ensure services offer a culturally safe response to the needs of Aboriginal and Torres Strait Islander people, in line with the principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the diverse needs of Culturally and Linguistically Diverse (CALD) and Lesbian, Gay, Bisexual, Trans, Intersex and Queer (LGBTIQ+) people.
- Program direction and oversight processes developed and maintained.
- Support continuous program improvement.
- Collaborate with the WA MHC to identify existing activity and opportunities to value-add within communities where MHC Suicide Prevention Coordinators are located.
- Collaborate with MHC, to implement gatekeeper and community mental health and suicide awareness training.
- Work in partnership with community and people with lived experience to develop and implement activities to meet the needs of identified priority population groups or communities and prevent suicidal distress.
- Facilitate inclusive governance structures with community members and lived experience representatives, to establish and manage expectations.
- Strengthen regional planning and address gaps in services, building community capability to prevent and respond to suicidal distress.
- Lead knowledge and information sharing about suicide prevention program delivery in Australia using evidence to improve the effectiveness, efficiency and appropriateness of systems-based approaches to suicide prevention.

## Activity coverage

Activities will be commissioned in locations where there are existing building blocks, such as a defined minimum set of in-situ services, including general practice. Armadale is a key focus area, in the Perth South PHN region. Some activities are statewide.

To help determine priority locations, a multiple criteria decision analysis, aligned to the PHN Commonwealth program guidance, will continue to be implemented. WAPHA utilises a socio-technical decision support and planning methodology, combining a data-driven technical value for money analysis with stakeholder engagement and discussion, to identify and rank priority locations and interventions for commissioning.

WAPHA's placed based teams will continue to provide information on existing local systems, collaboratives, and partnerships. Place-based decision making will also be informed by WAPHA's needs assessments, which will include population health analysis and consultation with clinicians, community, service providers and partner agencies. This will be complemented by the quantitative and qualitative data of partner agencies.

Due diligence and environmental scanning will be undertaken in consultation with State Government partners, to ensure a location is not overserviced and/or services are not duplicated. WAPHA has partnership arrangements and well-established communication channels with the Health Service Providers, the Mental Health Commission, Department of Health, Aboriginal Health Council of WA and industry peaks, which will help enable this process.

## **Needs Assessment Priorities \***

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18
Improve access to early intervention suicide prevention services. (Metro)	18
Support the mental health of older people and assist primary care providers to identify older people who may need additional support or referrals to services. (Metro)	18
Improve coordinated and integrated care for people experiencing complex and severe mental health who can be managed in within primary care settings. (Metro)	18

# **Activity Demographics**

## **Target Population Cohort**

This activity will be targeted to:

- Children & Youth .
- People at risk of suicidal ideation, attempted suicide or who are bereaved by suicide.
- People living in locationally disadvantaged communities.
- Residents of Residential Aged Care Facilities.
- Aboriginal and Torres Strait Islander people.
- LQBTQIA+ community.
- CALD community members.

Whilst this activity does not target Aboriginal populations, the PHN supports the principles of the Gayaa Dhuwi (Proud Spirit) Declaration, which will be embedded in low intensity service models and adhered to in the development and delivery of services. Commissioned services will be expected to ensure cultural safety and equality of care for Aboriginal and Torres Strait Islander people (including Aboriginal health workers employed within these services).

Specific activities will be identified and implemented using the Aboriginal and Torres Strait Islander Suicide Prevention Evaluation Project (ATSISPEP) systems-based model in collaboration with the Aboriginal Regional Governance Group.

# **Activity Consultation and Collaboration**

#### Consultation

WA Primary Health Alliance has undertaken a wide range of stakeholder consultation and engagement activities to support the provision of suicide prevention services in the Perth South PHN region. These have been conducted at both a national, state, regional and local level, and are used to inform, strengthen and build capacity and capability in the services that have been commissioned and to ensure that the best use is made of the available resources and investment in mental health services. Consultation will continue to occur with the following key stakeholders:

- WA Mental Health Commission (MHC) (to identify duplication of activity and specify roles of Suicide Prevention Coordinators and Community Liaison Officers).
- MHC-WAPHA Suicide Prevention Working Group.
- MHC-WAPHA Aftercare Working Group.
- StandBy Regional Coordinators.
- Wesley Lifeforce Suicide Prevention Coordinators.
- Aboriginal Health Council of Western Australia.
- Black Dog institute.

### Collaboration

The PHN is committed to ongoing collaboration with the following key stakeholders:

- Consumers.
- Carers and family members.
- Commissioned service providers.
- General practitioners and general practices.
- Health Service Providers.
- WA Mental Health Commission (MHC).
- WA MHC Suicide Prevention and Community Liaison Officers.
- Local mental health and social service providers.
- Culture Care Connect Program coordinators.
- 31 organisations listed in the 40 Commonwealth funded projects included in The National Suicide Prevention Leadership and Support Program, such as the Black Dog Institute.
- WA Local Government Association.
- Royal Australian College of General Practitioners.
- Existing Mental Health/Suicide Prevention Collaborative within the PHN e.g., IAR Training and Support Officers.

- MHC- WAPHA Suicide Prevention Working Group.
- MHC- WAPHA Aftercare Working Group.
- StandBy Regional Coordinators.
- Wesley Lifeforce Suicide Prevention Coordinators.
- Aboriginal Health Council of Western Australia.
- Rural Health West.
- Australian Practice Managers Association.
- Culture Care Connect Coordinators.

All collaborative activities are aimed at ensuring the commissioning of effective and sustainable face to face and virtual low intensity services, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving consumers and carers where possible.

Program Key Priority Area \*

Mental Health Priority Area 6: Aboriginal and Torres Strait Islander mental health services

**Other Program Key Priority Area Description** 

## Aim of Activity \*

To provide a holistic and seamless continuum of care for Aboriginal and Torres Strait Islander people that is integrated within a stepped care approach to meet individual and local needs.

This activity will aim to ensure that services are supported to target the mental health and social and emotional wellbeing needs of Aboriginal and Torres Strait Islander people. It will also be aimed at commissioning culturally appropriate services that provide clear referral and care pathways with mental health, alcohol and other drug, social and emotional wellbeing and other community support services.

In addition, this activity aims to ensure that the level of care provided is determined by an individualised standardised clinical assessment that will be used to assign an appropriate level of care and inform referral decisions.

The Perth South PHN will aim to:

- Integrate Aboriginal and Torres Strait Islander mental health services into a stepped care approach.
- Engage local Aboriginal and Torres Strait Islander people and communities, where possible, in the co-designing of locally driven regional plans and service delivery;
- Improve referral pathways between GPs, Aboriginal Community Controlled Health Services, social and emotional wellbeing,

alcohol and other drug, and mental health services.

- Maintain clear collaborative structures to optimise partnerships to enhance the penetration, quality, integration and effectiveness of services. The PHN will utilise the WAPHA and Aboriginal Health Council of WA (AHCWA) Memorandum of Understanding (MOU) to inform delivery of culturally appropriate mental health treatment and treatment supports in the Aboriginal controlled sector and mainstream sectors.
- Recognise and promote Aboriginal and Torres Strait Islander leadership by supporting Gayaa Dhuwi (Proud Spirit) Declaration implementation. The PHN will utilise the WAPHA and AHCWA MOU to inform delivery of culturally appropriate mental health treatment and treatment supports in the Aboriginal controlled sector and mainstream sectors.
- Promote the sharing of information between agencies using informed consent as an enabler of clinical care coordination and service integration.
- Develop strategic joint regional planning for mental health and suicide prevention services with health service providers and the WA Mental Health Commission, via the Joint Service Planning and Governance Committee, as part of the WA BILATERAL SCHEDULE ON MENTAL HEALTH AND SUICIDE PREVENTION..
- Ensure clinical and cultural competency of the workforce.
- Strengthen linkages between primary care services and other services provided by state, national and non-government organisations and strengthen both intra and cross-regional service partnerships.
- Strengthen both intra- and cross-regional service partnerships.

## **Description of Activity \***

Aboriginal and Torres Strait Islander mental health services are an integral part of a stepped care approach. Services use a range of evidence-based early intervention strategies, such as those programs that have been developed or implemented in accordance with the nine guiding principles underpinning the National Strategic Framework for Aboriginal and Torres Straits Islander Peoples' Mental Health and Social and Emotional Wellbeing [2017–2023].ii

Our focus is on empowering Aboriginal Community Controlled Health Organisations (ACCHOs) to develop and deliver services. The WA Foundational Plan for Mental Health, Alcohol and Other Drug Services, and Suicide Prevention commits us to work with the WA Mental Health Commission and Health Service Providers:

- To support the implementation of the Gayaa Dhuwi (Proud Spirit) Declaration, by ensuring greater regional leadership, self-determination and capability of Aboriginal people and organisations.
- To ongoing recognition and strengthening of ACCHSs as leaders in Aboriginal primary healthcare, including through sustainable funding for partnerships in prevention and early intervention activities, as well as general capacity building.
- To developing cooperative partnerships to achieve the common objective of providing Aboriginal people with improved access to services and to enable continuity of care at transition points across the healthcare system.

The PHN will work in partnership with Aboriginal stakeholders and consumers to ensure new and existing service models operate within a social and emotional wellbeing framework. Services will be culturally appropriate and recognise the social, emotional, spiritual, and cultural wellbeing of a person. The PHN is cognisant that for many Aboriginal peoples, connection to land, culture, spirituality, family, and community have significant impacts on their health and wellbeing. The PHN will support commissioned providers to deliver culturally appropriate services, recognising the importance and inter-relationship between physical health, mental health, spiritual needs, and social and emotional wellbeing. Services will be holistic, tailored to meet local needs, and focused on recovery and trauma informed practice. Interdisciplinary approaches using partnerships with the Aboriginal community-controlled sector, alcohol and other drug, and other community support services will be supported to integrate locally driven regional planning and service delivery. This will improve access to high quality, evidence-based services using culturally appropriate models of care that have both culturally informed mental health clinical care, and social and emotional wellbeing services.

The services will be delivered by an appropriately skilled workforce including:

- General practitioners
- Clinical psychologists
- Mental health competent registered psychologists, occupational therapists, and social workers
- Mental health competent Aboriginal health practitioners
- Aboriginal peer support workers

This activity will ensure that commissioned mental health treatment services (as per activities MH 2000 - Low Intensity Services and MH 3000 - Psychological Therapy Services) for Aboriginal and Torres Strait Islander individuals are provided within a holistic framework that encompass their overall physical, social, emotional, spiritual, and cultural wellbeing and involves their family

and/or community.

It is proposed that the following will be commissioned:

- In person interventions offered as part of community treatment services.
- Clinical care coordination services.
- Suicide prevention services.
- Services provided through headspace.
- Aboriginal and Torres Strait Islander specific mental health services.

As further guidance and information is released, activities of the commissioned services may need to be refined and modified. This will be conducted in partnership and collaboration with the commissioned service providers. If it is determined that the current service provider does not have the capacity or capability to continue/undertake the service, then the PHN will consider the most appropriate commissioning method and approach the market to support or find another suitable service provider.

Concurrent to this activity, WAPHA has committed to the development of a Cultural Competency Framework and an Aboriginal Cultural Capability Framework, which encompasses cultural awareness, cultural competency and cultural safety. These frameworks will facilitate opportunities to improve the cultural competence and clinical safety of services through continuous quality improvement and support programs. The frameworks will assist the PHN to reflect on current practice, identify areas that will improve cultural safety for communities, and develop cultural competence in internal staff and external stakeholders including commissioned services, resulting in better health and wellbeing outcomes for Aboriginal, CALD and LGBTQIA+ communities.

#### Data collection

The Perth South PHN will ensure that effective monitoring and evaluation systems and processes use analysis of primary mental health care – minimum data set (PMHC MDS) data in relation to the proportion of the regional population receiving commissioned mental health services that were culturally appropriate.

The approach taken by the PHN to capture this data includes formally training new commissioned service providers in the collection and submission of data to the PMHC-MDS, in accordance with the PMHC-MDS Specifications and Data Definitions and directing the service providers to the suite of support resources available.

## Needs Assessment Priorities \*

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
There is a need for culturally appropriate mental health services for Aboriginal populations. (Metro)	34
Support Aboriginal people to navigate the primary care system and access appropriate services. (Metro)	34

**Activity Demographics** 

#### **Target Population Cohort**

The Aboriginal and Torres Strait Islander mental health services will be targeted at individuals who are:

- with, or at risk of developing mild to moderate and, in some circumstances, severe mental illness who can be most appropriately managed in primary care.
- unable to equitably access MBS treatments due to overlapping factors, indicating disadvantage, including:
- o low income
- o job insecurity
- o material disadvantage
- o limited personal resources
- o social isolation
- o poor health literacy
- o other social, economic, cultural and personal reasons
- experiencing locational disadvantage.

Yes

#### **Indigenous Specific Comments**

The following key stakeholders will have a role in the design and implementation of these services:

- GPs, who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- The Aboriginal Health Council of WA and Aboriginal Medical Services, who will assist to promote and strengthen culturally appropriate and accessible primary mental health care, within a framework of social and emotional wellbeing.
- WA Mental Health Commission, the Child and Adolescent Health Service and the South Metropolitan Health Service and East Metropolitan Health Service, who will build capability and promote integration across the sector.
- Mental health service providers, who will work to strengthen partnerships and ensure services are culturally appropriate and connected to country and culture
- Alcohol and other drug service providers, who will work to strengthen cross-sectoral working.

# **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 2: Child and youth mental health services

**Other Program Key Priority Area Description** 

## Aim of Activity \*

To deliver easily accessible, family-friendly, evidence based early intervention services for children and young people, starting at as young an age as practicable. Where indicated, this will comprise of low intensity and psychological therapy services, and clinical care coordination activities.

This activity aims to provide services for children and young people, that are developmentally and culturally appropriate and are integrated with local services to prevent the escalation of acuity, and unwarranted emergency department presentations. This approach will enhance the mental health and wellbeing outcomes of children and young people and reduce suicidal behaviour, particularly in areas of limited-service availability and high demand.

The Perth South PHN will aim to:

- Integrate youth services into a stepped care approach.
- Consolidate and strengthen linkages and referral pathways between headspace centres with primary care services, educational and vocational providers, and other local community support services.
- Strengthen local regional planning for mental health services and suicide prevention, for children and young people.
- Promote locally driven regional partnerships between primary care providers and:
- o state government funded clinical services

o non-government services

o private practitioners

o other services, such as alcohol and other drug services, and

o educational/social providers.

- Promote evidence-based practice and the collection of data that demonstrates the impact of interventions.
- Address service gaps and support sustainable primary mental health care provision for children and young people.
- Monitor the quality and integrity of the services being commissioned, including workforce capability.
- Identify and target young people in selected location who may be at risk of ongoing mental illness.

## **Description of Activity \***

The Children and Youth Mental Health Primary Care Services activity is an integral part of a best practice stepped care approach and is premised on being a developmentally appropriate early intervention. A region specific, cross sectoral approach will be implemented for children and young people with, or at risk of, mental illness. The activity will be integrated, equitable, personcentred and optimistic.

Services will be supported to deliver flexible and responsive models of care to meet the needs of children and young people and their families, who are at risk of, or living with, mental illness and co-occurring substance misuse. The (Insert PHN region) PHN will work in partnership, where indicated, with Health Service Providers, Child and Adolescent Health Services, Family Support Service providers, Aboriginal Medical Services and other local services, to consolidate and foster local regional planning and integration. All PHN commissioned services will provide culturally sensitive, evidence-based clinical best practice models, such as those described by the National Centre of Excellence in Youth Mental Health.

The range of services delivered under this activity are:

- headspace services
- youth enhanced services
- youth early psychosis (headspace based)

The Children and Youth Services will be delivered by a suitably skilled workforce including psychiatrists; clinical psychologists; mental health competent registered psychologists, occupational therapists, nurses, and social workers, mental health competent Aboriginal health workers and peer workers. Services will be face to face low intensity, psychological therapy, and clinical care coordination offered as part of community treatment services.

### Activities

- Work collaboratively with the Australian Government Department of Health and Aged Care, Orygen, and other key stakeholders on the design, implementation and evaluation of Early Psychosis Youth Services (EPYS) and Youth Enhanced Services (YES) in WA.
- Implement the WAPHA headspace strategy, including enhanced digital access to services (including MOST Moderated Online Social Therapy).
- Commence the development and delivery of evidence-based early intervention services for young people with, or at risk of, severe mental illness (being managed in primary care).
- Deliver training to build relationships with and provide ongoing support to General Practitioners and clinicians in Kids Head to Health Centres as the IAR is adapted for specific cohorts.
- Work with Health Service Providers, Child and Adolescent Health Services, Aboriginal Medical Services, Aboriginal Mental Health Services, Family Support Services and other regional organisations to ensure appropriate pathways for referral and support are available for children and young people with or at risk of mental illness in the context of implementation of regional mental health and suicide prevention plans.
- Promote resources for clinical and non-clinical professionals available under Orygen the National Centre of Excellence for Youth Mental Health.
- Support the WA Mental Health Commission (MHC) and relevant state departments to determine the commissioning approach as well as the establishment and operation of the Midland Kids H2H service in line with the Head to Health Kids National Service Model.
- Ensure services offer a culturally safe response to the needs of Aboriginal and Torres Strait Islander people, in line with the principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the diverse needs of Culturally and Linguistically Diverse (CALD) and Lesbian, Gay, Bisexual, Trans, Intersex and Queer (LGBTIQ+) people.
- Program direction and oversight processes developed and maintained.
- Support continuous program improvement.

## Activity coverage

Services will be commissioned in locations where there are existing building blocks, such as a defined minimum set of in-situ services, including general practice.

To help determine priority locations, a multiple criteria decision analysis, aligned to the PHN Commonwealth program guidance, will be implemented. WAPHA will utilise a socio-technical decision support and planning methodology, combining a data-driven technical value for money analysis with stakeholder engagement and discussion, to identify and rank priority locations and interventions for commissioning.

WAPHA's placed based teams will provide information on existing local systems, collaboratives, and partnerships. Place-based decision making will also be informed by WAPHA's needs assessments, which will include population health analysis and consultation with clinicians, community, service providers and partner agencies. This will be complemented by the quantitative and qualitative data of partner agencies.

Due diligence and environmental scanning will be undertaken in consultation with State Government partners, to ensure a location is not overserviced and/or services are not duplicated. WAPHA has partnership arrangements and well-established communication channels with the Health Service Providers, the Mental Health Commission, Department of Health, Aboriginal Health Council of WA and industry peaks, which will help enable this process.

## Data collection

The Perth South PHN will ensure that effective monitoring and evaluation systems and processes use analysis of Primary Mental Health Care—Minimum Data Set (PMHC MDS) data in relation to:

- Proportion of regional youth population receiving PHN commissioned youth-specific mental health services.
- Enhanced clinical outcomes for young people receiving PHN-commissioned mental health interventions.
- Average cost of child and youth-specific mental health interventions per service contact and episode of care.
- Completion rates for clinical outcome measures reported in the PMHC-MDS for this cohort.
- Proportion of PHN annual flexible funding allocated to child and youth mental health services.

## **Needs Assessment Priorities \***

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Ensure integrated and stepped care services are available for people experiencing mental health issues, including younger people. (Metro)	18
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18
Improve access to early intervention suicide prevention services. (Metro)	18
Improve coordinated and integrated care for people experiencing complex and severe mental health who can be managed in within primary care settings. (Metro)	18

# **Activity Demographics**

#### **Target Population Cohort**

The primary focus will be on young people aged 12-25 years, as a significant proportion of PHN funding for this cohort is attached to the Federal Government's flagship youth mental health service – headspace. As with WAPHA's general approach to mental health, services will look to target young people at risk of, or experiencing mental ill-health from an underserviced population; unable to equitably access Medicare Benefits Scheme treatments due to overlapping factors indicating disadvantage (e.g. low

income or inability to access services during business hours, job insecurity, material disadvantage, limited personal resources, social isolation, poor health literacy, other social, economic, cultural and personal reasons); and/or experiencing locational disadvantage.

Whilst this activity is not targeted to Aboriginal populations, the PHN supports the principles of the Gayaa Dhuwi (Proud Spirit) Declaration, which will be embedded in low intensity service models and adhered to in the development and delivery of services. Commissioned services will ensure cultural safety and equality of care for Aboriginal and Torres Strait Islander people (including Aboriginal Health Workers employed within these services).

# **Activity Consultation and Collaboration**

#### Consultation

WA Primary Health Alliance has undertaken a wide range of stakeholder consultation and engagement activities to support the provision of mental health services for children and young people in the Perth South PHN. These have been conducted at both a national, state, regional and local level, and are used to inform, strengthen and build capacity and capability in the services that have been commissioned and to ensure that the best use is made of the available resources and investment in mental health services.

Key stakeholders for this activity include:

- Children and young people.
- Parents, family members and carers.
- Commissioned service providers.
- General practitioners and general practices.
- Health Service Providers.
- WA Mental Health Commission.
- WA Department of Education.
- Local mental health and social service providers.
- Orygen.
- Family Support Services.

In addition to those listed above, the Perth South PHN consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level. These include:

- Australian Government Department of Health and Aged Care.
- Women and Newborn Health Service.
- Child and Adolescent Health Service.

- Royal Australian College of General Practice.
- WA Local Governments.
- Aboriginal Health Council of WA.
- Aboriginal advisory groups.
- Australian Medical Association (WA).
- Consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

The PHN will continue to build on existing and new relationships to ensure the commissioning of effective and sustainable services for children and young people, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving children, young people and their families, where possible.

The role of the key stakeholders in the implementation of this service will be:

- General practitioners, who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- State-based Health Service Providers (Local Health Networks) will assist to strengthen partnerships, regional planning and clarify transition points into state-based services.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will support and inform to promote and strengthen culturally appropriate and accessible primary mental health care services.

Program Key Priority Area \*

Mental Health Priority Area 2: Child and youth mental health services

Other Program Key Priority Area Description

## Aim of Activity \*

To provide young people, aged 12-25 years, with access to a suite of integrated, culturally appropriate services to holistically address their mental health and wellbeing.

Funding for the enhancement of headspace services is intended to increase access to coordinated, multi-disciplinary care for cohorts of young people, as well as to improve workforce attraction and retention.

The headspace activity aims to:

- Provide early intervention for young people aged 12-25 years at risk of developing or already experiencing mild to moderate mental health concern/illness;
- Facilitate access to evidence-based treatment for young people with mental health issues, including those with associated physical or drug and alcohol issues;
- Promote early help seeking;
- Contribute to an increase in the mental health literacy of young people;
- Enable better access to primary care services, including allied health and general practitioner services for young people;
- Support local, integrated approaches to meeting the needs of young people, particularly people with mental health, drug and alcohol, physical, educational and vocational issues;
- Consolidate and strengthen linkages and referral pathways with primary care services, educational and vocational providers, and

other local community support services.

#### Description of Activity \*

The headspace enhancement funding is being utilised to expand the headspace service's capacity to respond to local need, within the parameters of the headspace Model Integrity Framework.

headspace Armadale is using the funds to:

- Recruit staff, including a social worker and a CALD community engagement officer.
- Provide training and professional development to staff in the following focus areas: cultural competency, trauma informed care and suicide prevention.
- Improve care coordination, referral pathways and service integration, through the development of a clinical pathways diagram shared with related services.
- Enhance engagement and raise awareness of headspace activities within priority populations by participating in community events such as LGBTQI+ Wear it Purple Day and the Lumen Christi NAIDOC event.

The funds are enabling headspace Armadale to expand its capacity, to better meet youth needs within a diverse multicultural community.

#### Data collection

All client level activity data for services delivered to headspace clients is captured through the headspace Application Platform Interface (hAPI), to provide accurate reporting through the Primary Mental Health Care Minimum Data Set (PMHC MDS). Where clinical in-reach is being provided by local health services as jurisdictional contributions to enhancement and integration initiatives, data capture and reporting arrangements will be established between headspace service lead agencies and state-funded services.

#### Headspace Enhancement funding allocation

headspace Enhancement funds for Perth South PHN/Perth North PHN/Country WA PHN have been allocated across all headspace services within the PHN. All headspace centre services within the PHN have received an increase in funding up to the \$1.25m funding floor from 1 July 2023 with funding for satellite services increased to a floor of \$800k also from 1 July 2023. This increase recognises the increasing complexity of young people presenting to headspace services and to assist in improving access to coordinated, multi-disciplinary care for young people, as well as to improve workforce attraction and retention. WAPHA has historically utilised PHN Mental Health and Suicide Prevention flexible funding to supplement the headspace specific funding of the headspace services and the enhancement funds have been utilised to augment the baseline funding for all of the WA services by titrating in the enhancement funds and taking out the MHSP flexible funds over the course of the 2022-23 to 2025-26 funding period. Funding for the Esperance headspace Centre service has been retained at a higher level in line with advice received from DHAC in relation to the higher level of funding provided for this centre on establishment (\$1.435m).

# **Activity Consultation and Collaboration**

#### Consultation

headspace Armadale actively involves young people and their families and friends in the development, implementation and evaluation of services.

Key stakeholders for this activity include:

- Young people aged 12-25 years
- Parents, family members and carers
- Commissioned service providers
- General practitioners and general practices
- Health Service Providers

- WA Mental Health Commission
- WA Department of Education
- Local mental health and social service providers
- Orygen
- Family Support Services

In addition to those listed above, the PHN consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level. These include:

- Australian Government Department of Health and Aged Care
- WA Country Health Services
- Women and Newborn Health Service
- Child and Adolescent Health Service
- Royal Australian College of General Practitioners
- WA Local Governments
- Aboriginal Health Council of WA
- · Aboriginal advisory groups
- Australian Medical Association (WA)
- consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

The PHN will continue to build on existing and new relationships to ensure the commissioning of effective and sustainable services for young people, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving young people and their families, where possible.

The role of the key stakeholders in the implementation of this service will be:

- General practitioners, who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- State-based Health Service Providers (Local Health Networks) will assist to strengthen partnerships, regional planning and clarify transition points into state-based services.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will support and inform to promote and strengthen culturally appropriate and accessible primary mental health care services.

# **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 2: Child and youth mental health services

**Other Program Key Priority Area Description** 

## Aim of Activity \*

To provide young people, aged 12-25 years, with access to a suite of integrated, culturally appropriate services to holistically address their mental health and wellbeing.

Funding for the enhancement of headspace services is intended to increase access to coordinated, multi-disciplinary care for cohorts of young people, as well as to improve workforce attraction and retention.

The headspace activity aims to:

- provide early intervention for young people aged 12-25 years at risk of developing or already experiencing mild to moderate mental health concern/illness;
- facilitate access to evidence-based treatment for young people with mental health issues, including those with associated physical or drug and alcohol issues;
- promote early help seeking;
- contribute to an increase in the mental health literacy of young people;
- enable better access to primary care services, including allied health and general practitioner services for young people;
- support local, integrated approaches to meeting the needs of young people, particularly people with mental health, drug and alcohol, physical, educational and vocational issues;
- consolidate and strengthen linkages and referral pathways with primary care services, educational and vocational providers, and other local community support services.

## **Description of Activity \***

The headspace enhancement funding is being utilised to expand the headspace service's capacity to respond to local need, within the parameters of the headspace Model Integrity Framework.

headspace Cannington is using the funds for a range of activities. Internally the funds are being used to:

- Recruit staff including a social worker, CALD community engagement officer and youth access worker.
- Provide professional development and training for staff, with a focus on culturally safe care provision, trauma informed care, multicultural awareness and suicide prevention.
- Improve care coordination, referral pathways and service integration through the development of a clinical pathways diagram shared with related services.

Externally the funds are being used to enhance engagement and awareness of headspace activities, by conducting workshops at universities, high schools and various community events. Workshop content focuses on improving mental health literacy and supporting young people to become future leaders in the LGBTQI+ space (in collaboration with the Town of Victoria Park and local Pride community groups/organisations).

The funds are enabling headspace Cannington to meet youth needs within a diverse multi-cultural community through targeted staff recruitment for their multi-disciplinary workforce, engagement strategies, raising community awareness and engagement, and delivering workshops targeted to priority populations.

#### Data collection

All client level activity data for services delivered to headspace clients is captured through the headspace Application Platform Interface (hAPI), to provide accurate reporting through the Primary Mental Health Care Minimum Data Set (PMHC MDS). Where clinical in-reach is being provided by local health services as jurisdictional contributions to enhancement and integration initiatives, data capture and reporting arrangements will be established between headspace service lead agencies and state-funded services.

#### Headspace Enhancement funding allocation

headspace Enhancement funds for Perth South PHN/Perth North PHN/Country WA PHN have been allocated across all headspace services within the PHN. All headspace centre services within the PHN have received an increase in funding up to the \$1.25m funding floor from 1 July 2023 with funding for satellite services increased to a floor of \$800k also from 1 July 2023. This increase recognises the increasing complexity of young people presenting to headspace services and to assist in improving access to coordinated, multi-disciplinary care for young people, as well as to improve workforce attraction and retention. WAPHA has historically utilised PHN Mental Health and Suicide Prevention flexible funding to supplement the headspace specific funding of the headspace services and the enhancement funds have been utilised to augment the baseline funding for all of the WA services by titrating in the enhancement funds and taking out the MHSP flexible funds over the course of the 2022-23 to 2025-26 funding period. Funding for the Esperance headspace Centre service has been retained at a higher level in line with advice received from DHAC in relation to the higher level of funding provided for this centre on establishment (\$1.435m).

# **Activity Consultation and Collaboration**

## Consultation

headspace Cannington actively involves young people and their families and friends in the development, implementation and evaluation of services.

Key stakeholders for this activity include:

- Young people aged 12-25 years
- Parents, family members and carers
- Commissioned service providers
- General practitioners and general practices
- Health Service Providers
- WA Mental Health Commission
- WA Department of Education
- Local mental health and social service providers
- Orvgen

#### • Family Support Services

In addition to those listed above, the PHN consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level. These include:

- Australian Government Department of Health and Aged Care
- WA Country Health Services
- Women and Newborn Health Service
- Child and Adolescent Health Service
- Royal Australian College of General Practitioners
- WA Local Governments
- Aboriginal Health Council of WA
- Aboriginal advisory groups
- Australian Medical Association (WA)
- consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

The PHN will continue to build on existing and new relationships to ensure the commissioning of effective and sustainable services for young people, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving young people and their families, where possible.

The role of the key stakeholders in the implementation of this service will be:

- General practitioners, who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- State-based Health Service Providers (Local Health Networks) will assist to strengthen partnerships, regional planning and clarify transition points into state-based services.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will support and inform to promote and strengthen culturally appropriate and accessible primary mental health care services.

- support local, integrated approaches to meeting the needs of young people, particularly people with mental health, drug and alcohol, physical, educational and vocational issues;
- consolidate and strengthen linkages and referral pathways with primary care services, educational and vocational providers, and other local community support services.

#### **Description of Activity \***

Over many years, WA Primary Health Alliance has utilised PHN Mental Health and Suicide Prevention flexible funding to supplement the headspace specific funding of headspace Fremantle. The enhancement funds are therefore being utilised to augment and support resources already in place at this service. The activities described in this section need to be considered in this context. The Mental Health and Suicide Prevention flexible funding has been withdrawn at this headspace site and has been utilised to commission additional mental health activity as reported via the PMHC MDS.

The headspace enhancement funding is being utilised to expand the headspace service's capacity to respond to local need, within the parameters of the headspace Model Integrity Framework.

headspace Fremantle is using the funds to:

- Support and retain their skilled workforce through supplementing salaries.
- Conduct promotional and engagement activities to raise awareness of headspace services within the community.

The service provider has indicated attraction and retention of staff has been challenging in the currently competitive market. The enhancement funding has therefore enabled headspace Fremantle to retain its multidisciplinary workforce.

#### Headspace Enhancement funding allocation

headspace Enhancement funds for Perth South PHN/Perth North PHN/Country WA PHN have been allocated across all headspace services within the PHN. All headspace centre services within the PHN have received an increase in funding up to the \$1.25m funding floor from 1 July 2023 with funding for satellite services increased to a floor of \$800k also from 1 July 2023. - Women and Newborn Health Service
- Child and Adolescent Health Service
- Royal Australian College of General Practitionersce
- WA Local Governments
- Aboriginal Health Council of WA
- Aboriginal advisory groups
- Australian Medical Association (WA)
- Consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

The PHN will continue to build on existing and new relationships to ensure the commissioning of effective and sustainable services for young people, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving young people and their families, where possible.

The role of the key stakeholders in the implementation of this service will be:

- General practitioners, who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- State-based Health Service Providers (Local Health Networks) will assist to strengthen partnerships, regional planning and clarify transition points into state-based services.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will support and inform to promote and strengthen culturally appropriate and accessible primary mental health care services.

Existing, Modified or New Activity \*

Modified

#### **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 2: Child and youth mental health services

Other Program Key Priority Area Description

#### Aim of Activity \*

To provide young people, aged 12-25 years, with access to a suite of integrated, culturally appropriate services to holistically address their mental health and wellbeing.

Funding for the enhancement of headspace services is intended to increase access to coordinated, multi-disciplinary care for cohorts of young people, as well as to improve workforce attraction and retention.

The headspace activity aims to:

- provide early intervention for young people aged 12-25 years at risk of developing or already experiencing mild to moderate mental health concern/illness;
- facilitate access to evidence-based treatment for young people with mental health issues, including those with associated physical or drug and alcohol issues;
- promote early help seeking;
- contribute to an increase in the mental health literacy of young people;
- enable better access to primary care services, including allied health and general practitioner services for young people;
- support local, integrated approaches to meeting the needs of young people, particularly people with mental health, drug and alcohol, physical, educational and vocational issues;
- consolidate and strengthen linkages and referral pathways with primary care services, educational and vocational providers, and other local community support services.

#### **Description of Activity \***

Over many years, WA Primary Health Alliance has utilised PHN Mental Health and Suicide Prevention flexible funding to supplement the headspace specific funding of headspace Rockingham. The enhancement funds are therefore being utilised to augment and support resources already in place at this service. The activities described in this section need to be considered in this context. The Mental Health and Suicide Prevention flexible funding has been withdrawn at this headspace site, and has been utilised to commission additional mental health activity as reported via the PMHC MDS.

The headspace enhancement funding is being utilised to expand the headspace service's capacity to respond to local need, within the parameters of the headspace Model Integrity Framework.

headspace Rockingham is using the funds to:

- Recruit a staff member.
- Support and retain their skilled workforce through supplementing salaries.

The service provider has indicated attraction and retention of staff has been challenging in the currently competitive market.

#### Data collection

All client level activity data for services delivered to headspace clients is captured through the headspace Application Platform Interface (hAPI), to provide accurate reporting through the Primary Mental Health Care Minimum Data Set (PMHC MDS). Where clinical in-reach is being provided by local health services as jurisdictional contributions to enhancement and integration initiatives, data capture and reporting arrangements will be established between headspace service lead agencies and state-funded services.

#### Headspace Enhancement funding allocation

headspace Enhancement funds for Perth South PHN/Perth North PHN/Country WA PHN have been allocated across all headspace services within the PHN. All headspace centre services within the PHN have received an increase in funding up to the \$1.25m funding floor from 1 July 2023 with funding for satellite services increased to a floor of \$800k also from 1 July 2023. This increase recognises the increasing complexity of young people presenting to headspace services and to assist in improving access to coordinated, multi-disciplinary care for young people, as well as to improve workforce attraction and retention. WAPHA has historically utilised PHN Mental Health and Suicide Prevention flexible funding to supplement the headspace specific funding of the headspace services and the enhancement funds have been utilised to augment the baseline funding for all of the WA services by titrating in the enhancement funds and taking out the MHSP flexible funds over the course of the 2022-23 to 2025-26 funding period. Funding for the Esperance headspace Centre service has been retained at a higher level in line with advice received from DHAC in relation to the higher level of funding provided for this centre on establishment (\$1.435m).

#### Needs Assessment Priorities \*

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Ensure integrated and stepped care services are available for people experiencing mental health issues, including younger people. (Metro)	18
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18
Improve access to early intervention suicide prevention services. (Metro)	18
Improve coordinated and integrated care for people experiencing complex and severe mental health who can be managed in within primary care settings. (Metro)	18

#### **Target Population Cohort**

Young people aged 12-25 years at risk of developing or already experiencing mild to moderate mental health concern/illness.

Whilst this activity is not targeted specifically to Aboriginal people, headspace service providers are expected to ensure cultural safety and equality of care for Aboriginal and Torres Strait Islander people (including Aboriginal health workers employed within these services).

#### **Activity Consultation and Collaboration**

#### Consultation

headspace Rockingham actively involves young people and their families and friends in the development, implementation and evaluation of services.

Key stakeholders for this activity include:

- Young people aged 12-25 years
- Parents, family members and carers
- Commissioned service providers
- General practitioners and general practices
- Health Service Providers
- WA Mental Health Commission
- WA Department of Education
- Local mental health and social service providers
- Orygen
- Family Support Services

In addition to those listed above, the PHN consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level.

#### These include:

- Australian Government Department of Health and Aged Care
- WA Country Health Services
- Women and Newborn Health Service
- Child and Adolescent Health Service
- Royal Australian College of General Practitioners
- WA Local Governments
- Aboriginal Health Council of WA
- Aboriginal advisory groups
- Australian Medical Association (WA)
- consumer and carer peak bodies and consumer associations.

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

The PHN will continue to build on existing and new relationships to ensure the commissioning of effective and sustainable services for young people, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and involving young people and their families, where possible.

The role of the key stakeholders in the implementation of this service will be:

- General practitioners, who will assist to develop and strengthen referral pathways across primary care, and to specialist services where indicated.
- State-based Health Service Providers (Local Health Networks) will assist to strengthen partnerships, regional planning and clarify transition points into state-based services.
- Aboriginal Health Council of WA and Aboriginal Medical Services who will support and inform to promote and strengthen culturally appropriate and accessible primary mental health care services.

**Activity Title \*** 

MH 9000 - Integrated Health Precincts

Existing, Modified or New Activity \*

Existing

#### **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 8: Regional mental health and suicide prevention plan

**Other Program Key Priority Area Description** 

#### Aim of Activity \*

Implementation, at scale, of an Integrated Healthcare Precinct, with the aim of achieving a more integrated system in Armadale (specific location within the Armadale Statistical Area Level 3 to be determined).

The Precincts approach will involve several healthcare organisations including general practice, in the specific location, working together in an intentional, coordinated way to maximise health outcomes, cost efficiencies to improve the experience of individuals accessing services and clinicians providing them. The Precincts will aim to optimise care for people with mental health issues and other multiple long term health conditions.

The approach is aligned to the objectives of the Quintuple Aim in Healthcare and with Priority actions of WA Primary Health Alliance's Population Health Strategy: Create a culture and mechanisms that promote safe, coordinated, person-centred and high-quality integrated care; and Mental Health Strategy: Support integration between general practice, local mental health services, specialist treatment services and social services through promotion of information sharing, transparent referral mechanisms and care pathways.

It will also be consistent with the aims of the Equally Well National Consensus Statement and maintain a focus on improving the physical health of people who experience mental illness and other long term health conditions.

#### **Description of Activity \***

To foster an Integrated Healthcare Precinct, the Primary Health Alliance (PHN) will:

- Undertake stakeholder engagement to refine the approach and to support procurement.
- Commission coordination activities to support integration at a local level.
- Leverage existing partnerships and contractual relationships (including with organisations that provide alcohol and other drug services, suicide prevention services, social and emotional wellbeing services and Aboriginal health services in Armadale), to develop agreed referral pathways, that promote seamless patient transition between different services and service types.
- Work with local stakeholders (including organisations referred to in the point above) to support the development of a shared vision, joint governance and leadership, planning, and funding to provide a mechanism to address fragmentation of services, duplication, and inefficiencies in service provision.
- Identify and build on assets existing in the local community and work together with the community to address gaps.
- Provide support to safeguard the ongoing involvement of a local General Practice, which is invested in the principles of the approach and has commitment, capacity and clinical and business capability, to be part of the Precinct.
- Work with local stakeholders to develop a realistic, staged implementation plan, a detailed change management plan and a communication strategy.

The PHNs role and level of engagement in supporting the Precinct in Armadale will also be informed by the commensurate location specific demand and supply characteristics.

#### **Needs Assessment Priorities \***

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Reduce non-urgent emergency department attendances and improve access to alternative services. (Metro)	12
Support primary health care providers to manage chronic disease populations and build capacity for patient self-management. (Metro)	11
Ensure integrated and stepped care services are available for people experiencing mental health issues, including younger people. (Metro)	18
Improve coordinated and integrated care for people experiencing complex and severe mental health who can be managed in within primary care settings. (Metro)	18

MH-AMHCT 8000 - Head to Health Adult Centres and Satellites

Existing, Modified or New Activity \*

Modified

#### **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 1: Low intensity mental health services

**Other Program Key Priority Area Description** 

#### Aim of Activity \*

Head to Health Centres (formerly Adult Mental Health Centres) and Satellites provide a safe place for adults experiencing emotional and psychological distress or crisis, to access mental health information, services and supports.

The centres and satellites offer a low stigma, soft entry point to engagement and assessment for people who may be experiencing distress or crisis (including people whose needs are too complex for many current primary care services to meet, but who are not eligible for or awaiting care from state public community mental health services).

The centres and satellites are intended to complement, not replace or duplicate, mental health services already provided in the community. They are not designed to offer longer term care but are based on an episode of care model, delivering packages of evidence-based care and family support to cover the short to medium term, which could last from a few weeks to several months.

#### Description of Activity \*

The Centres and Satellites will seek to address key gaps in the system by:

- Providing a highly visible and accessible entry point to services for people experiencing psychological distress, where all feel safe and welcome.
- Offering assessment using the Intake, Assessment and Referral decision support tool (IAR-DST) to match people to the services

#### they need.

- Providing on the spot support, treatment, and advice without prior appointments or out of pocket cost.
- Offering an episode of care model based on short to medium term multidisciplinary care, aimed at stabilising symptoms for people with moderate to high levels of mental health need, whose needs are not being met through other services.
- Operating under extended opening hours, to support better access.

It is intended that the following benefits will be generated through this approach:

- People will be supported to connect to pathways of care through integration with existing community services, WAPHA Commissioned Services, general practice, and WA state funded services, as required.
- People will receive immediate advice and care which will reduce their level of mental and emotional distress.
- Individuals experiencing high levels of psychological distress will receive the care they need from the Centre, resulting in a reduction in the number of non-urgent presentations to local hospital emergency departments.
- Individuals will experience reduced waiting times through a no wrong door approach leading to an improved care experience.
- People requiring support in the area, or those attending the centre or satellite, will recognise the centre or satellite as an accessible entry point to the mental health care system for the services and information they need.

Concurrent to this activity, WAPHA has developed our Aboriginal Cultural Competency and Capability Framework, LGBTIQA+ Equity and Inclusion Framework and Multicultural Competency and Capability Framework. These frameworks will facilitate opportunities to improve the cultural competence and clinical safety of services through continuous quality improvement and support programs. The frameworks will assist the PHN to reflect on current practice, identify areas that will improve cultural safety for communities, and develop cultural competence in internal staff and external stakeholders including commissioned services, resulting in better health and wellbeing outcomes for Aboriginal, CALD and LGBTQIA+ communities. Head to Health service development, procurement and implementation will be guided by these frameworks.

#### Activities

- Co-design the localised service model with consumers, carers, HSPs and other local stakeholders to ensure it meets community
- Ensure the model of care offers a culturally safe response to the needs of Aboriginal and Torres Strait Islander people, in line with the principles of the Gayaa Dhuwi (Proud Spirit) Declaration and the diverse needs of Culturally and Linguistically Diverse (CALD) and Lesbian, Gay, Bisexual, Trans, Intersex and Queer (LGBTIQ+) people.
- Develop and maintain program direction and oversight processes.
- Commission service providers.
- Support continuous program improvement.
- Maintain information about the service and service model on WAPHA's webpage.

#### Activity coverage

The Australian Government determines the locations of Head to Health centres and satellites. WAPHA will advocate that services be commissioned in locations where there are existing building blocks, such as a defined minimum set of in-situ services, including general practice.

To assist the Australian Government to determine priority locations, a multiple criteria decision analysis, aligned to the PHN Commonwealth program guidance, will be implemented when expansion of the program is announced. WAPHA will utilise a sociotechnical decision support and planning methodology, combining a data-driven technical value for money analysis with stakeholder engagement and discussion, to identify and rank priority locations and interventions for commissioning.

WAPHA's placed based teams will provide information on existing local systems, collaboratives, and partnerships. Place-based decision making will also be informed by WAPHA's needs assessments, which will include population health analysis and consultation with clinicians, community, service providers and partner agencies. This will be complemented by the quantitative and qualitative data of partner agencies.

Due diligence and environmental scanning will be undertaken in consultation with State Government partners, to ensure a location is not overserviced and/or services are not duplicated. WAPHA has partnership arrangements and well-established communication channels with the Health Service Providers, the Mental Health Commission, Department of Health, Aboriginal Health Council of WA and industry peaks, which will help enable this process.

#### Data collection

The Perth South PHN will ensure that effective monitoring and evaluation systems and processes are in situ to obtain data regarding the:

- Number of clients accessed at entry and only provided with information (no follow up data collected)
- Number of clients provided with an assessment.
- Number of referrals made.
- Number of referrals accepted.
- Number of clients accessing short to medium term services.
- Number of follow-ups.
- Number of formal referral pathways/MOUs.
- Number of complaints.

The approach taken by the PHN to capture this data includes formally training new commissioned service providers in the collection and submission of data to the PMHC-MDS, in accordance with the PMHC-MDS Specifications and Data Definitions and directing the service providers to the suite of support resources available. In addition, the provider must use the Adult Mental Health reserved data elements, as required.

#### **Needs Assessment Priorities \***

#### **Needs Assessment**

WAPHA Needs Assessment 2022-2024

#### **Priorities**

Priority	Page reference
Increase access to low cost- local mental health services in outer-suburbs and areas with limited-service availability but high demand. (Metro)	18
Improve coordinated and integrated care for people experiencing complex and severe mental health who can be managed in within primary care settings. (Metro)	18

#### **Activity Demographics**

#### **Target Population Cohort**

Adults aged 18 and above seeking information and/or support in times of crisis/distress or as needs emerge, including vulnerable populations who are disconnected from mainstream mental and other health care options, who need immediate or short to medium term mental health support or assistance with navigating appropriate available services.

The principles of the Gayaa Dhuwi (Proud Spirit) Declaration will be embedded in the model and adhered to in the development and delivery of services.

The centres and satellites will ensure cultural safety for Aboriginal and Torres Strait Islander people (including Aboriginal Health Workers), so they receive quality responses and equality of care.

The centres and satellites will provide a highly visible and accessible entry point for Aboriginal and Torres Strait Islander individuals, that is welcoming and safe.

#### **Activity Consultation and Collaboration**

#### Consultation

WA Primary Health Alliance has undertaken a wide range of stakeholder consultation and engagement activities to support the provision of Head to Health centres and satellites in the Perth South PHN region. These have been conducted at both a national, state, regional and local level, and are used to inform, strengthen and build capacity and capability in the services that have been commissioned and to ensure that the best use is made of the available resources and investment in mental health services. The Perth South PHN consults and engages a variety of stakeholders to ensure that all commissioned services complement and add value to the impact and contribution of other mental health activity at a state, national and regional level. These include:

- Consumers and carers.
- Consumer and carer peak bodies and consumer associations.
- Australian Government Department of Health.
- National Mental Health Commission.
- WA Mental Health Commission.
- Child and Adolescent Health Service.
- Women and Newborn Health Service.
- GPs.
- Royal Australian College of General Practice.
- WA Local Governments.
- Aboriginal Health Council of WA.
- Aboriginal Advisory Groups.
- Australian Medical Association (WA).

Ongoing consultation and engagement activities will be conducted through a range of methods including face-to-face and group sessions, and online platforms.

#### Collaboration

All collaborative activities are aimed at ensuring the commissioning of effective and sustainable Head to Health services, building capacity, capability and integration across the sector, consolidating and strengthening care pathways within primary care, and engaging consumers and carers at all stages of the commissioning cycle.

#### **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 2: Child and youth mental health services

Other Program Key Priority Area Description

#### Aim of Activity \*

To increase the efficiency and effectiveness of primary mental health services for young people aged 12 to 25 with, or at risk of, mental illness by:

- Improving data collection and reporting on headspace wait times.
- Improving access to and integration of primary mental health care services, to ensure young people with mental illness receive the right care in the right place at the right time by reducing wait times for clinical services at designated headspace centres for young people with the highest need.

#### **Description of Activity \***

This activity is part of the headspace Wait Time Reduction Program which:

- Identifies existing headspace services experiencing high wait times for clinical services and develops and implements activities and initiatives to assist in reducing these wait times.
- Supports the long-term sustainability of the headspace program by improving access to services, appropriately managing demand, and improving the health outcomes of young people aged 12 to 25 with, or at risk of, mental illness, and their families.
- Increases access to clinical support through a dedicated online support service for young people in areas experiencing increased demand (provided by headspace National).
- Improves data collection and reporting on headspace wait times to support planning, research, and analysis of headspace service

#### demand.

The following activities will occur:

- i. headspace Mandurah
- Recruit a Community Engagement Officer to promote and support the brief intervention program.
- Recruit a Program Lead to be trained in intervention and coordinate its delivery within the Centre.
- Provide a stipend for a PHD student to undertake evaluation of the intervention program.
- ii. headspace Rockingham
- Recruit a Community Engagement Officer to promote and support the brief intervention program.
- Recruit a Program Lead to be trained in intervention and coordinate its delivery within the Centre.

#### **Activity Priorities and Description**

Program Key Priority Area \*

Mental Health Priority Area 7: Stepped care approach

Other Program Key Priority Area Description

#### Aim of Activity \*

To improve the health and wellbeing of people at risk of poor health outcomes and difficulty accessing appropriate services who have frequent contact with hospital emergency departments (EDs) by linking these individuals, who would previously be discharged to their own recognisance, with place-based community service providers. A key aspect of the service is the utilisation of peer workers and connecting service users to general practice.

The Choices mental health program is for people with moderate and, in some cases, severe mental illness and is targeted at those who lack the resources (material and non-material) to manage "acute" personal difficulties and, as a result, enter the healthcare system as "crisis" or "social care" presentations characterised by:

- insufficient informal personal supports to manage crises.
- mild, moderate and, in some cases, severe mental illness.
- significant associated functional impairment (days out of role).
- alcohol and other drugs comorbidity/intoxication.
- being unable to equitably access MBS (Medicare Benefit Schedule) treatments due to a constellation of overlapping factors, including:

o job insecurity

o material disadvantage

o social isolation

o poor health literacy

o other social, economic, cultural, and personal reasons

o poorly developed self-regulation and problem-solving skills.

#### **Description of Activity \***

Choices is a non-clinical service designed to in-reach into the emergency departments to assist individuals with limited personal and socials supports who frequently attend metropolitan hospital emergency departments.

A unique aspect of the service is the use of peer workers to engage with people in settings that may be confronting for them. Peers provide brief interventions and immediate support and can assist clients with personalised support including: engaging with mental health and alcohol and other drug services as well as other supports such as accommodation and financial services, utilising a range of strategies such as low intensity psychological interventions, stress management, shared problem solving, goal setting and motivational interviewing.

The Choices Expansion (funded under a CHHP grant) involved two separate but connected service developments. Firstly, the provision of the Choices service at additional metropolitan hospital emergency departments (ED). Secondly, the commissioning of a single mobile clinical team to provide enhanced clinical support (called "Extra Choices") for Choice's' clients with higher acuity and co-occurring mental health and alcohol and drug (AOD) use within EDs where Choices operates.

The Perth North and South PHNs commissioned the additional non-clinical ED in-reach service provision, and the WA Mental Health Commission were responsible for commissioning the mobile team (as per the conjoint submission requirements of the CHHP grants). Since these services were established, the environment in which Choices Expansion operates has continued to evolve. As originally planned, clients are drawn from a clinical population characterised by co-occurring alcohol and other drug and mental disorders set against a background of generalised instrumental, psychosocial, and personal dysfunction ("comorbidity-plus"). They include a significant proportion of Aboriginal and Torres Strait Islander people (~30% of the Choices cohort). However, the proportion of referrals who are at risk of harm to self – suicide, suicide attempts, and self-neglect - has increased steadily. The future development of the Choices service will need to be set against the new operational context which includes the conjoint development of targeted community-based suicide prevention and aftercare services, including embedded peer-supports and other opportunities that may arise from the National Mental Health and Suicide Prevention Agreement and the WA Bilateral Schedule.

The Choices Expansion service will be ceasing on 30 June 2024. Clients will stop being accepted into the service from 30 March 2024 at the Rockingham Hospital site and 30 April 2024 for the other sites. WAPHA and Ruah are working together on the communication approach to ensure consistent messaging to stakeholders. The service is ceasing due to the maturity of the health sector in WA and availability of similar services in the PHN region. other similar services now offered within the hospital.
