Activity Priorities and Description

Program Key Priority Area

Population Health

Aim of Activity

Strengthening primary health care and ensuring all Australians have access to affordable primary care services is a priority for the Australian Government Department of Health, Disability and Ageing.

The Medicare UCC policy was developed by the Australian Government to ease the pressure on hospital emergency departments and give Australian families more options to see a suitably qualified and skilled healthcare professional when they have an urgent but not life-threatening need for care. All Medicare UCCs are required to provide bulk-billed services, be open during extended business hours and accept walk-in patients for specified urgent care presentations.

The Medicare UCCs will be:

Based in existing general practitioner (GP) clinics, community health centres or Aboriginal Controlled Community Health Service (ACCHS).

Operate extended business hours and accept walk-in patients.

Bulk-billed resulting in no out-of-pocket costs to the patient.

Flexible and diverse, responding to the needs of the local community.

High quality, safe and effective.

Treat conditions that do not require a hospital admission (i.e., broken bones, wounds, and minor burns).

Medicare UCCs will support people to connect to pathways of care with the broader health system, including ensuring referrals back to a patient's regular GP or care provider to ensure that the patient receives continuity of care. All referral pathways into and out of the Medicare UCC should be driven by local need and co-designed with relevant stakeholders to ensure connectivity to existing community health services, GPs, non-government sector, state and territory funded services, hospital and ambulatory services and other support services.

The intended outcomes of this activity are to:

Improve access to urgent care in a non-hospital setting, particularly for vulnerable groups. This includes the aim of changing consumer behaviour about options for appropriate care for urgent conditions that are not immediately life-threatening.

Reduce the pressure on emergency department (ED) presentations in partner hospitals by providing patients with short term, episodic care for urgent conditions that are not immediately life-threatening.

Support integration with existing local health services and complement general practice.

Description of Activity

Activity 1.1 – Perth City Medicare Urgent Care Clinic

Background

The Department of Health, Disability and Ageing and Western Australian governments have entered into a bilateral agreement, with the WA Primary Health Alliance (WAPHA) as designated commissioner, to deliver Medicare Urgent Care Clinics (MUCC) in eight designated WA locations; focused on specified actions that are intended to reduce pressure on emergency departments (ED).

In February 2023, WAPHA undertook an Expression of Interest (EOI) process to identify eligible providers in the Perth City SA3 including general practices, community health centers and Aboriginal Community Controlled Health Services (ACCHS) that are suitable to operate a Medicare UCC.

The tender for Perth City MUCC was awarded to Rudloc Road Medical and Dental Centre, 40 Rudloc Road, Morley, WA 6062 operating under the ForHealth corporate group. Located 9km from Royal Perth ED, the Medicare UCC is open 365 days per year to provide Urgent Care services to the local community. Hours vary per location based on local need, trends in ED demand and other considerations such as workforce. WAPHA work with providers to review hours at regular intervals.

Roles and responsibilities

WA Primary Health Alliance's Primary Care Portfolio, which works across the three WA PHNs, is responsible for delivering the PNPHN Perth City MUCC activity. An executive sub-committee oversees all PNPHN MUCC activities to ensure it aligns with funding requirements and guidance, and WAPHA's Strategic Plan 2023-2026.

WAPHA has an ongoing role in administering and managing the contract with the selected provider, working closely with East Metro Health Service and Royal Perth Hospital, and working with the Department of Health, Disability and Ageing to monitor and support Medicare UCC operations, including compliance and contractual requirements.

Key Activities

WAPHA will work with the Perth City MUCC team to understand, establish and maintain compliance with: Operational requirements, including the scope of urgent conditions treated, triage system and escalation pathways, accessibility including extended hours of operation and minimum physical facilities access requirements, patient follow up and communication with usual GP, follow up of diagnostic tests and referrals, referral pathways and integration with local hospital, staffing requirements, infection prevention and control as well as monitoring activity and clinical safety.

Facilities, infrastructure and equipment, including appropriate treatment areas and equipment, medications and appropriate poisons permit to store and administer, access to pathology as well as an x-ray facility and access to other radiology services.

MUCC design principles.

Ensuring that the MUCC is patient-focused, improving access across extended hours to episodic urgent medical care without a fee, support people to connect to pathways of care through local integration with the broader health system and operate a robust governance framework.

Data onboarding and collection. The Department of Health, Disability and Ageing has identified key measures of success to inform the evaluation of MUCC's impact on emergency department presentations, assessing patient and provider experience and how MUCC's can be better integrated into the health system.

Priorities for the year ahead

Work with the MUCC to improve public awareness about when it is appropriate to seek medical assistance via a UCC, and when assistance should be sought from an emergency department.

Support the MUCC to strengthen integration and referral pathways between the UCC and hospital care, including investigation of direct referral via the WA Virtual Emergency Department (WAVED), and ongoing engagement with the WA Health System Improvement Unit.

Ongoing strengthening of the WA MUCC Collaborative group, which meets quarterly and is a forum for MUCC employee networking and discussion, troubleshooting, ongoing education and collaboration.

Implementation of new contract management processes including monthly reporting and detailed reporting templates.

Work with MUCCs to provide a culturally safe, inclusive and welcoming environment for Aboriginal and Torres Strait Islander people.

Governance

The WA Medicare UCC steering committee has been established and meets regularly with representatives from WA Department of Health and WAPHA to provide governance and monitor implementation and activity. A bimonthly bi-lateral meeting is also in place with representatives from WAPHA, the WA Department of Health and the Department of Health, Disability and Ageing, Urgent Care Branch to provide operational updates and escalation of any issues from the WA Medicare UCC Steering Committee.

Department of Health, Disability and Ageing

A Memorandum of Understanding has been executed between East Metro Health Service, WA Department of Health and WAPHA, with all parties participating in a regular integration working groups to develop streamlined pathways and communication channels to further enhance access to urgent care for the community.

Activity Consultation and Collaboration

Consultation

The PHN consulted with and continues to consult with a variety of stakeholders including:

- Hospital emergency department teams
- WA Health management
- WA GP Urgent Care network
- National Health Service Directory
- Health Direct
- Department of Health, Disability and Ageing
- Other National PHNs commissioning UCCs
- Aboriginal Medical Services

Collaboration

This activity was designed and implemented with collaboration from the following:

- Hospital emergency department teams for the development and implementation of pathways of care
- WA Health management for strategic oversight of the UCC activity
- Department of Health, Disability and Ageing as funder and for policy and communications resource
- Perth North Health Service Providers for development of specific UCC models in designated regions
- Department of Premier and Cabinet for strategic oversight of UCC activity
- Local health care providers including Radiology and Pathology for design of patient pathway
- General Practitioners for design, delivery, monitoring and evaluation of UCCs (includes non UCC GPs in local area)
- Practice teams (clinical and administrative) for design, delivery, monitoring and evaluation of UCCs

- Reduce the pressure on emergency department (ED) presentations in partner hospitals by providing patients with short term, episodic care for urgent conditions that are not immediately life-threatening.

Support integration with existing local health services and complement general practice.

Description of Activity

Activity 1.2 – Clarkson Medicare Urgent Care Clinic – operating from August 2023.

Background

The Department of Health, Disability and Ageing and Western Australian governments have entered into a bilateral agreement, with the WA Primary Health Alliance (WAPHA) as designated commissioner, to deliver Medicare Urgent Care Clinics in eight designated WA locations; focused on specified actions that are intended to reduce pressure on emergency departments (ED).

- In February 2023, WAPHA undertook an Expression of Interest (EOI) process to identify eligible providers in the Clarkson SA2 area including general practices, community health centres and Aboriginal Community Controlled Health Services (ACCHS) that are suitable to operate a Medicare UCC. A preferred provider was not identified in the initial EOI process.

The contract for Clarkson MUCC was awarded to Ocean Keys Family Practice, 2 Ebb Way, Clarkson, WA 6030 following detailed discussions with the Department of Health, Disability and Ageing and a sole source procurement process. The clinic is owner operated with the Practice Principle leading the delivery of the Urgent Care Clinic. Located 10km from Joondalup Health Campus ED, the Medicare UCC is open 365 days per year to provide Urgent Care services to the local community. Hours vary per location based on local need, trends in ED demand and other considerations such as workforce. WAPHA work with providers to review hours at regular intervals.

Roles and responsibilities

WA Primary Health Alliance's Primary Care Portfolio, which works across the three WA PHNs, is responsible for delivering the PNPHN Clarkson MUCC activity. An executive sub-committee oversees all PNPHN MUCC activities to ensure it aligns with funding requirements and guidance, and WAPHA's Strategic Plan 2023-2026.

WAPHA has an ongoing role in administering and managing the contract with the selected provider, working closely with North Metro Health Service and Joondalup Health Campus, and working with the Department to monitor and support Medicare UCC operations, including compliance and contractual requirements.

Key Activities

WAPHA will work with the Clarkson MUCC team to understand, establish and maintain compliance with:

- Operational requirements, including the scope of urgent conditions treated, triage system and escalation pathways, accessibility including extended hours of operation and minimum physical facilities access requirements, patient follow up and communication with usual GP, follow up of diagnostic tests and referrals, referral pathways and integration with local hospital, staffing requirements, infection prevention and control as well as monitoring activity and clinical safety.
- Facilities, infrastructure and equipment, including appropriate treatment areas and equipment, medications and appropriate poisons permit to store and administer, access to pathology as well as x-ray facilities and other radiology services.

- **MUCC design principles.** Ensuring that the MUCC is patient-focused, improving access across extended hours to episodic urgent medical care without a fee, support people to connect to pathways of care through local integration with the broader health system and operate a robust governance framework.
 - **Data onboarding and collection.** The Department of Health, Disability and Ageing has identified key measures of success to inform the evaluation of MUCC’s impact on emergency department presentations, assessing patient and provider experience and how MUCC’s can be better integrated into the health system.
- Priorities for the year ahead
- Work with the MUCC to improve public awareness about when it is appropriate to seek medical assistance via a UCC, and when assistance should be sought from an emergency department.
 - Support the MUCC to strengthen integration and referral pathways between the UCC and hospital care, including investigation of direct referral via the WA Virtual Emergency Department (WAVED), and ongoing engagement with the WA Health System Improvement Unit.
 - Ongoing strengthening of the WA MUCC Collaborative group, which meets quarterly and is a forum for MUCC employee networking and discussion, troubleshooting, ongoing education and collaboration.
 - Implementation of new contract management processes including monthly reporting and detailed reporting templates.
 - Work with MUCC’s to provide a culturally safe, inclusive and welcoming environment for Aboriginal and Torres Strait Islander people.

Governance

The WA Medicare UCC steering committee has been established and meets regularly with representatives from the WA Department of Health and WAPHA to provide governance and monitor implementation and activity. A bimonthly bi-lateral meeting is also in place with representatives from WAPHA, the WA Department of Health and Department of Health, Disability and Ageing, Urgent Care Branch to provide operational updates and escalation of any issues from the WA Medicare UCC Steering Committee.

A Memorandum of Understanding has been executed between North Metro Health Service, WA Department of Health and WAPHA, with all parties participating in a regular integration working groups to develop streamlined pathways and communication channels to further enhance access to urgent care for the community.

- Reduce the pressure on emergency department (ED) presentations in partner hospitals by providing patients with short term, episodic care for urgent conditions that are not immediately life-threatening.
- Support integration with existing local health services and complement general practice.

Description of Activity

Activity 1.3 – Midland Medicare Urgent Care Clinic – operating from 11 December 2023.

Background

The Department of Health, Disability and Ageing and Western Australian governments have entered into a bilateral agreement, with the WA Primary Health Alliance (WAPHA) as designated commissioner, to deliver Medicare Urgent Care Clinics in eight designated WA locations; focused on specified actions that are intended to reduce pressure on emergency departments (ED).

In May 2023, WAPHA undertook an Expression of Interest (EOI) process to identify eligible providers in the Midland-Guildford SA2 area including general practices, community health centers and Aboriginal Community Controlled Health Services (ACCHS) that are suitable to operate a Medicare UCC.

The tender for Midland MUCC was awarded to North Street Medical Centre, 40 Great Northern Highway, Midland, WA 6056 operating under the Brecken Health corporate group. Located 2km from St John of God Midland ED, the Medicare UCC are open 365 days per year to provide Urgent Care services to the local community. Hours vary per location based on local need, trends in ED demand and other considerations such as workforce. WAPHA work with providers to review hours at regular intervals.

Roles and Responsibilities

WA Primary Health Alliance's Primary Care Portfolio, which works across the three WA PHNs, is responsible for delivering the PNPHN Midland MUCC activity. An executive sub-committee oversees all PNPHN MUCC activities to ensure it aligns with funding requirements and guidance, and WAPHA's Strategic Plan 2023-2026. WAPHA has an ongoing role in administering and managing the contract with the selected provider, working closely with East Metro Health Service and St John of God Midland, and working with the Department of Health, Disability and Ageing to monitor and support Medicare UCC operations, including compliance and contractual requirements.

Key Activities

WAPHA will work with the Midland MUCC team to understand, establish and maintain compliance with:

- Operational requirements, including the scope of urgent conditions treated, triage system and escalation pathways, accessibility including extended hours of operation and minimum physical facilities access requirements, patient follow up and communication with usual GP, follow up of diagnostic tests and referrals, referral pathways and integration with local hospital, staffing requirements, infection prevention and control as well as monitoring activity and clinical safety.
- Facilities, infrastructure and equipment, including appropriate treatment areas and equipment, medications and appropriate poisons permit to store and administer, pathology as well as x-ray facilities and other radiology services.

- MUCC Design principles. Ensuring that the MUCC is patient-focused, improving access across extended hours to episodic urgent medical care without a fee, support people to connect to pathways of care through local integration with the broader health system and operate a robust governance framework.
 - Data onboarding and collection. The Department of Health, Disability and Ageing has identified key measures of success to inform the evaluation of MUCC’s impact on emergency department presentations, assessing patient and provider experience and how MUCC’s can be better integrated into the health system.
- Priorities for the year ahead
- Work with the MUCC to improve public awareness about when it is appropriate to seek medical assistance via a UCC, and when assistance should be sought from an emergency department.
 - Support the MUCC to strengthen integration and referral pathways between the UCC and hospital care, including investigation of direct referral via the WA Virtual Emergency Department (WAVED), and ongoing engagement with the WA Health System Improvement Unit.
 - Ongoing strengthening of the WA MUCC Collaborative group, which meets quarterly and is a forum for MUCC employee networking and discussion, troubleshooting, ongoing education and collaboration.
 - Implementation of new contract management processes including monthly reporting and detailed reporting templates.
 - Work with MUCC’s to provide a culturally safe, inclusive and welcoming environment for Aboriginal and Torres Strait Islander people.

Governance

The WA Medicare UCC steering committee has been established and meets regularly with representatives from WA Department of Health and WAPHA to provide governance and monitor implementation and activity. A bimonthly bi-lateral meeting is also in place with representatives from WAPHA, the WA Department of Health and the Department of Health, Disability and Ageing, Urgent Care Branch to provide operational updates and escalation of any issues from the WA Medicare UCC Steering Committee.

A Memorandum of Understanding has been executed between East Metro Health Service, the WA Department of Health and WAPHA, with all parties participating in a regular integration working groups to develop streamlined pathways and communication channels to further enhance access to urgent care for the community.
