

# WA Collaborative Commissioning Partnership

## Our shared vision

### Together we will

- Deliver a dynamic, high-quality, and responsive One Health system for all Western Australians.
- Enable safe, evidence-based, person-centred care through integrated, accessible, and equitable services delivered by skilled, supported providers.

### To do this, we will focus on

#### Community

Delivering place-based health care solutions, focused on priority populations, that keep people's care based in their communities.

#### Outcomes

Improving health and wellbeing for all Western Australians by strengthening care integration, navigation, literacy, and information sharing—while addressing the social determinants of health.

#### Partnerships

Working together to plan and shape the future of health care delivery in Western Australia.

## Our shared commitment

### Our actions will be guided by these fundamental principles

## Our priority areas

### Governance, Funding and Planning

Establish joint governance frameworks, funding models, and collaborative planning to ensure equitable access to care for priority populations across WA.

### Care in the Community

Deliver targeted reforms to strengthen the primary health care workforce (failed and thin markets) and team-based, multidisciplinary care for people with complex and chronic conditions.

### Data & Information and Communication Technology

Utilise data and information and communication technology to drive an innovative and integrated approach to meeting the complex health needs in priority populations across the primary, acute and community care-based sectors.
