

WAPHA LEARNING WEBINAR

Closing the chronic kidney disease (CKD) detection gap - the importance of uACR testing

Join WA Primary Health Alliance, Kidney Health Australia and nephrologist Dr Awf Abdulrahman Shaban for a practical webinar on who needs a Kidney Health Check, why uACR testing matters and how to manage chronic kidney disease (CKD) and albuminuria with confidence.

This webinar will focus on:

- The vital role of a uACR test in detecting CKD and accurately assessing kidney damage and disease progression.
- How medication therapy supports reduction of albuminuria to lower a patient's risk of progression and cardiovascular events.
- Planning for the ongoing management of patients with CKD and albuminuria.
