

WAPHA LEARNING WEBINAR

Progressive chronic kidney disease (CKD)

To register click here or scan the QR code

90 per cent of kidney function can be lost before people experience symptoms. As a result, late referral is common and 17 per cent of people commence dialysis within 90 days of being referred to a kidney service.

Join WA Primary Health Alliance, Kidney Health Australia and nephrologist Dr Andrew Sunderland for this practical webinar about progressive chronic kidney disease (CKD).

This webinar will unpack Chapter 5 of the CKD Management in Primary Care handbook (5th edition) and focus on the following topics:

- How multiple morbidities can distract from noticing the clinical signs of CKD in a real-life deidentified case.
- How to manage CKD to slow progression in a complex presentation.
- When to refer a patient with CKD to a nephrologist.
- Available kidney failure treatment options.

This webinar is accredited for 1 RACGP and ACRRM EA CPD hour. To register, click here or scan the QR code above.

Details

Thursday 3 December
6:30pm to 7:30pm
Webinar

Speaker

Dr Sunderland
Consultant, Nephrology & Renal Transplant, SCGH

Dr Andrew Sunderland works as a Consultant in Nephrology and Renal Transplant at SCGH and also travels to Geraldton for renal clinics.

He completed his medical degree at UWA and a fellowship in Clinical Nephrology at the Oxford Kidney Unit, UK. He is interested in the management of CKD and the strategies to delay disease progression.
